Preface

From 1975 to 1981 the Deutsche Forschungsgemeinschaft financed a project to retrieve papyri from the cartonnage coffins in West Berlin's Egyptian Museum. Instead of a whole coffin, a single coffin fragment was dismantled. Still it produced enough material for an entire BGU volume. These documents along with various odd pieces from disparate sources – all from Ptolemaic Egypt – were published in BGU XIV (see the introduction there). During the latter years of the same project, another coffin fragment was taken apart, producing again enough material for an entire BGU volume. The documents from this second coffin, together with the occasional odd piece from other sources, make up the contents of the present volume, thus presenting the final results of the project initiated twenty years ago and so generously funded by the Deutsche Forschungsgemeinschaft.

This coffin fragment produced a group of documents comprising an ensemble which for convenience' sake can best be labelled the "Athenodoros archive". For the most part, this archive consists of letters written by or addressed to a certain Athenodoros, *dioicete* over probably a sub-provincial district in the Herakleopolite nome in the middle years of Augustus's rule. Other letters and documents, official and private, while nowhere bearing directly on the person of Athenodoros and his correspondants, nonetheless are written sometimes by the same scribes who wrote the letters in the Athenodoros archive, concern the same persons and date from the same period. These are the most complete and comprehensible texts taken from the coffin section. In addition, dozens of fragments, neatly cut in half either length-wise or cross-wise, and upper or lower right or left corner sections of letters, all obviously belonging to the same archive, were also recovered from the same coffin.

After discovering that the Demosthenes speech out of this coffin, P. 21284, was part of the same sheet as P. 16895 (published by W. Müller, *Forschungen u. Berichte* 10 [1968] 128f.), it seemed a good idea to check the adjacent numbers for related papyri. W. Müller and G. Poethke kindly allowed me access to the papyri in the collection on their side of the still-divided city. My suspicions were soon confirmed. I was able to join a few of the newly discovered texts with the corresponding sections which had been extracted from cartonnage and inventoried by our predecessor papyrologists in Berlin at the beginning of the century. Unfortunately, a number of papyri in the same series (P. 16902–16913) have disappeared without a trace. One wonders if they too would have provided some fragments belonging to Athenodoros's archive. It seems senseless to publish the numerous, disparate, unjoined fragments until their missing sections someday

should have been recovered from whatever coffin section they might happen still to be lying in, hidden from view. (See on the dispersion of fragments of the same document in different pieces of cartonnage: O. Guéraud, P. Enteuxis, p. x; H. Cadell, P. Sorbonne 46 introd.; J. Scherer, YCS 28 [1985] 57.)

In addition to the Athenodoros archive whose documents date from 21/20 B.C. to 5 A.D., this coffin section also produced a magical text (P. 21243: ZPE 33 [1979] 261ff.), a Greek-Latin word list (P. 21246: Congr. 16, 31–41) and the aforementioned speech of Demosthenes (P. 21284: ZPE 48 [1982] 61f.). An anomaly among all the documents from the Athenodoros archive of Augustan date is P. 25263, an oath by a catoecic cavalry soldier dating to 52 B.C. This is the earliest dated text from this source, and it will be published in a volume of contemporary Ptolemaic documents.

Another group of disparate documents comprises those papyri which were evidently extracted from cartonnage at the beginning of this century and deposited in boxes for safe-keeping. The boxes survived the vicissitudes of World War II and eventually landed in the Ägyptisches Museum (Staatliche Museen Preussischer Kulturbesitz, West Berlin) where they were rediscovered during the research project financed by the Deutsche Forschungsgemeinschaft. These are: **2559, 2560–2576, 2577, 2665, 2672, 2673, 2674.**

From other sources: **2588, 2589.**

The extremely time-consuming and delicate operations of dismantling the mummy cases, extracting their constituent papyri and finally straightening them out, cleaning their surfaces of all foreign material, pressing them flat, and finally placing the papyri to be published between glass plates were capably and masterfully executed by Jürgen Hofmann, papyrus restorer in the Ägyptisches Museum. The excellent reproductions are due to the professional skill of the same museum's photographer, Margarete Büsing.

Many and heartfelt thanks to Joan Christman for perspicacious proof-reading and saving me from numerous errors. Likewise, to Hermann Harrauer and Christian Wildberg for formatting this work on the computer and for otherwise often coming to my rescue when I was at the end of my electronic rope.

Finally, special thanks to Jörg Aigner of Mega-Satz-Service (Berlin) who devoted much time and energy, spit and polish, putting this book into its final form.

Editorial conventions:

....	unread letters
[...] or [αβγδ]	lacuna
αβγδ	uncertain, unclear letters
(αβγδ)	resolved symbol or abbreviation
\αβγδ/	supralinear insertion
<αβγδ>	erroneous omission
[αβγδ]	deletion
{αβγδ}	superfluous letters

Accents and punctuation, unless otherwise noted, are modern additions to the transcriptions. Lectional signs on the original texts are noted either in the apparatus criticus or the line notes, as are orthographical faults, etc. Numbers in bold face indicate papyri in the series Berliner Griechische Urkunden. The first measurement indicates the maximum height, the second the maximum width. The word *verso*, as it is employed in this volume, designates the vertical fibers of the papyrus bearing either the address of the letters or secondary entries in the accounts.

2558 Edict

P. 25384
15 x 14.7 cm.

Herakleopolites
July 22, 12

Margins: upper 2.2, left 1.8, lower 2.5, right 0.5–3.4 cm. The writing is similar to that of PSI X 1160 = Montevicchi, Papirologia, tav. 30; and P. Mich. inv. 1674 in BASP 21 (1984) 84. Verso is devoid of writing.

The present document is the earliest known edict from Roman Egypt. Given the fragmentary state of the papyrus, determining its nature is well nigh impossible. Even the few tantalizing bits that can be pieced together do not lead to anything really conclusive. Someone is accused of making a pretense of something (ll. 3–4). The former prefect Barbarus and a companion (-calper?) are mentioned (l. 4). Enigmatic is the juxtaposition of a cloak and a trip through the provinces (ll. 5–6). The penalties for persons caught acting contrary to this edict will be arrest and punishment (ll. 6–8). Anyone who is caught red-handed will be handed over to the prefect (ll. 8–9).

R. Katzoff, "Sources of Law in Roman Egypt: the Role of the Prefect," ANRW II 13, 820, summarizes the external characteristics of the prefectural edict: 1) prefect's name (in early Augustan Egypt there is no address or greeting); 2) λέγει = *dicit*; 3) the edict proper, (without addressee or greeting) treating usually a single subject; 4) threat of a severe penalty for violation; 5) date (no concluding salutation precedes it). The present document adheres precisely to these criteria. Cf. Katzoff 810, for a list of edicts from Roman Egypt.

- 1]οκλος: The *κακοδαίμων* of papyrologists has played a particularly spiteful prank here and deprived us of the name of the prefect in office between P. Rubrius Barbarus and C. Turranius.

λέγει: Cf. M. Benner, *The Emperor Says: Studies in the Rhetorical Style in Edicts of the Early Empire*, Gothenburg 1975.

- 4]οκαλπερ: The only possibility would seem to be a Latin name ending in *-calper*.

- 4–5 Βάρβαρος [ὁ] ἡγεμῶνεύσας would be the most appropriate reading, if one could make anything out of the traces. Cf. 2595.2–3 n. The only attestations for Barbarus's period

in office derive from 15/14 and 13/12 B.C., without any more specific time references. At the time this edict was posted, however, he was no longer prefect. According to Robert Bennett, *The Prefects of Roman Egypt*, diss. Yale 1970, 163–166, no prefect at this time held office for more than four years. Hence, on the basis of 2595 (15/14 B.C.) and this document one can provisionally give P. Rubrius Barbarus a term in office from 16/15 to 13/12 B.C.

- 15 φαινόλη = Lat. *paenula*. Further attestations and discussion can be found in P. Yale 82.8 n.; P. Oxy. 4002.10 n.; Lauffer, *Preisedit*, p. 267 s.v.

Margins: upper 4.5, right 3–5.7, left 2, lower 5.3 cm. Interlinear spaces: lines 5–6: 3 cm; lines 11–12: 2 cm. Although one person seems to have written the first two entries (lines 1–5; 6–11), in the latter he used a different pen that was more blunt than normal. Verso blank.

Dioskurides and his colleagues, *sitologoi* in the village of Koma, certify to Taon-nophris various payments *in natura* on the tax called μοναρταβία κατοίκων for three different and non-consecutive years. Although not a single receipt on this sheet is complete, the lacunae in an entry can usually be filled out using the information from the corresponding sections in other entries.

Various criteria indicate that the document in question represents an extract from a tax register: 1) Three different payments for three different years are recorded here on one papyrus – in reverse order of payment (first, for the 38th year of Augustus, then for the 32nd year and finally for the 31st year). 2) The entries are written by two different persons. 3) There are no official signatures, no specific dates of payments and no salutations at the end of the individual documents. Hence, these are not separate, individual tax receipts written on one papyrus, but rather extracts. Cf. R. Bagnall, K. Worp, *APF* 30 (1984) 79–82, for "multiple-receipt tax rolls".

These extracts from *sitologos*-receipts are the earliest evidence for such receipts from Roman Egypt and the first ones from the Herakleopolites ever. Parallels are listed in the commentaries to 2299; P. Ups. Frid 4; P. Hamb. 208. The next oldest seem to be 787 (39/40 A.D.; Faiyum); P. Oxy. 38.2842 (29 A.D.?; Herakleopolites?).

Orders for Seed Grain

The following seventeen papyri are the earliest examples of orders for seed grain from Roman Egypt and thus to be inserted between the last attested Ptolemaic documents of the same genre (SB V 8755, 8756; 49-48 B.C. ?) and the first heretofore attested Roman ones (P. Lond. II 256 e (p. 96) = Wilcken, Chrest. 344; 11 A.D.; P. Vindob. Tandem 9; 10 and 12 A.D.).

A unique feature of the Berlin papyri is the *katasporeus-toparch* issuing the directives. In many parallel documents the *strategos* acts in collaboration with the royal scribe or other officials (such as the *phorologos* in P. Vindob. Tandem 9.20, or another person or group of persons in P. Köln 137), and uniformity is not apparent. Since the *katasporeus-toparch* appears in this function throughout the six years covered in the Berlin documents (8/7- 3/2 B.C.), it was evidently considered a completely normal state of affairs. Each official is also found acting independently in the same function as here, issuing orders for seed grain: the *katasporeus* in P. Oxy. 2185; the *toparch* in P. Lond. 256 d,e.

Depending on the year involved, two different individuals are attested issuing these orders: Heraclitos in the year 8/7, and Demetrios in the year 3/2.

The addressees involved are usually Dioskurides and his colleagues, *sitologoi* in the village of Koma in 8/7 and 3/2 (cf. 2559). In 2575 of uncertain dating, other *sitologoi* seem to be at work. In one document (2567) a scribe appears as addressee in the countersigning order.

Just as in P. Oxy. 2185.15-17, in several of the Berlin documents the village scribe

confirms the fact that the farmers receiving the seed grain actually farm the land they specify. In P. Köln 137 it is the *topogrammateus* who does the confirming.

On the *katasporeus* see P. Petaus 52 introd., P. Wisc. II 62; P. Mon. III, pp. 126–127; Oertel, Liturgie 188. On the *toparch*, Oertel, Liturgie 162.

For parallel documents, pertinent literature and description of the course of events involved in these orders see R. Hübner, P. Köln 137 introd.; K. Worp, P. Sijpesteijn, P. Vindob. Tandem 9 introd.; D. and U. Hagedorn in: P. Coll. Youtie I 22; D. Samuel, *ibid.*, 26; P. Berl. Leihg. II 26; P. Berol. 11559: G. Tax List

P. 25161

Herakleopolites
30 B.C. –14 A.D.

See Life 41–43 where this document is briefly discussed.

Five non-contiguous fragments 14–19 cm. high and 25–52 cm. wide, constituting the upper part of a papyrus roll, are extant. All told the remaining portion of the roll measures *ca.* 160 cm. in length. Since only the uppermost portion of the roll is preserved, its exact height must remain a matter for speculation; ditto for its original length. Altogether there are 29 columns and 526 lines.

Fg. A: 14.8 x 52.5 cm.; upper margin 2–2.5 cm.; intercolumnar spaces 1.5 cm. *Kollesis* 8.5 cm. from the right; another 17 cm. to the left of that one; another 17 cm. to the left of that one. A strip of papyrus 13 x 0.8 cm. has been glued diagonally across the tops of columns V and VI (= lines 52 and 67 which have been written over it).

Fg. B: 19 x 40.5 cm; margins: upper 2.5, left 3 cm.; intercolumnar spaces 1.5–2.5 cm. *Kollesis*: 2 cm. from the right; 18 cm. to the left of that one.

Fg. C: 19.4 x 25.6 cm; margins: left 2.5 cm, upper 2.5–3.5 cm, right 0.8; intercolumnar spaces 1–1.5 cm. *Kollesis*: 10 cm. from the left.

Fg. D: 22.7 x 42.7 cm; margins: upper 1.5; intercolumnar spaces: 1.5 cm. *Kollesis*: 7.5 cm. from the left edge; another 17.5 cm. to the right of that. Another 17.5 cm. to the right of that one must have followed. However, on the right the vertical fibers have disappeared, thus leaving a section consisting solely of horizontal fibers which would have overlapped the succeeding sheet, producing a three-layer join (cf. R. Coles, P. Harris II 212, introd.).

Fg. E: 20 x 25.7 cm.; margins: upper 1.5, left 3.5, right 2.7 cm.; intercolumnar spaces ± 1 cm. *Kollesis*: 5.5 cm. from the left; another 17.5 cm. to the right of that.

The order of the major fragments A – C results from various internal chronological data. Fg. A preserves portions of the descriptive heading for the whole document. Phaophi in the first line there is undoubtedly the first month for which tallies are recorded in the ensuing lines up to l. 117. The first entries on Fg. B (118–194) must obviously be for the month Hathyr, since Choiak (l. 199) heads the subsequent listing extending to the end of the fragment. Tybi is in the first line of fragment C = l. 214, hence placing it immediately after Fg. B. The two remaining fragments cannot be assigned with certainty to any place in the roll. However, since Fg. D includes mostly amounts of four drachmas it might originally have belonged to Fg. A. Fg. E recording amounts of two drachmas probably belonged to Fg. C.

Provenance: The only concrete internal evidence for the provenance is in l. 203 where a tally involving the gymnasiarchs of the metropolis is recorded. The external evidence is circumstantial. Since most of the late Ptolemaic and early Roman

papyri in the Berlin collection (extricated from cartonnage coffins found by the excavators in Abusir el-Melek, site of the ancient Busiris), come from there, the Herakleopolite nome can be posited with reasonable assurance as provenance of this text. While it turned out that some of the papyri were written in Alexandria (1050–1060, 1098–1184, *synchoreseis* contracts, for the most part), most of the documents from the Abusir el-Melek find derive from closer to home. Further possible internal supporting evidence are two putative *Herkunftsbezeichnungen* in the text itself: l. 72: Κρηκίης; l. 80: Ὀννίτης for citizens of Krekis (BGU XIV 2437.44; 2439.20,62) and Onne (*ibid.*, 2370.82.86, 2440.44) respectively, both villages in the Herakleopolite nome. The presence of these indications of origin in a list otherwise devoid of such indications implies that these men are registered as inhabitants of their respective home villages residing temporarily for one reason or another somewhere else (presumably in the metropolis, Herakleopolis).

Dating: The document commences with a heading of several lines undoubtedly once indicating the function and purpose of the ensuing listing. Κάισαρος, obviously referring to Augustus, appears in this heading. However, the papyrus is broken off on the left, and the heading is otherwise so lacunose that the exact year and date are forever lost and irretrievable. Since most of the cartonnage documents from Augustan Herakleopolis date from the 20s B.C., one can tentatively place this list within that period. A further criterion for the dating is the paleography. The writing shows striking similarities to the *Laterculi Alexandrini* (published by H. Diels, Abh. Kgl. Preuss. Ak. Wiss., Berlin 1904, with facsimile) but is somewhat more crude and cursive, befitting its documentary character. The same person who was responsible for this roll may have also penned another tax list in the Berlin collection (2674). Alongside some of the entries on the left is a diagonal stroke or blot of ink, presumably a check mark of some sort.

Since the beginning of this account with its heading is so fragmentary and the end (which might have contained itemized summaries) is entirely missing, it is difficult to posit any but the most general statement about its character and purpose. In all likelihood the list once constituted a month-by-month, day-by-day, and even morning-to-evening, κατ' ἄνδρα (exclusively male) list of tax-payers for probably the nome capital Herakleopolis. Each tax-payer is identified by name and (sometimes) father's name, or failing that, his profession (for cross-reference in a list of tax-payers according to occupation ?) and the amount he has paid (or is expected to pay?) on an unknown tax. (See most recently R. Bogaert, ZPE 79, 1989, 207–226, for the *status quaestionis* on the function of tax lists in Roman Egypt). The multifarious occupations and professions standing in lieu of the father's name reflect all levels of society; for example, line 14 τέκτων, 30 σιτομέτρης, 43 ἱπποκόμος, 47 λίνυφος, 48 γναφεύς, 49 λαχανοπώλης, 51 ἀύλητής, 57 παστοφόρος, 58 ἡπητής, 59 ὀνηλάτης, 71 οἰκοδόμος, 77 ποιμήν, 83 γέρδις, 84 χρυσοχοῦς, 110 ταριχευταί, 161, 427 χαλκεύς, 293 γρ(αφεύς), 313 ἱατρός, 323 κεραμεύς, 370 σκυτεύς. (See H. Harrauer, CPR XIII, Griech. Texte IX, pp. 49–173, for these trades and occupations.)

While the criteria are most tenuous and any thesis built upon them highly liable to collapse, I would like suggest that the present tax list might record payments on the capitation-tax (*laographia*) in Herakleopolis in the early years of Augustus's reign. It is particularly regrettable that the date is lost, since this list might have been one of the earliest attestations to the capitation-tax in Roman Egypt. Although not a single word in the whole document gives the slightest clue as to which tax is involved here, the fact that the names are all masculine and the fact that so many occupations are indicated remind one of the capitation-tax lists in the Princeton and Cornell collections.

The sole reference to the *laographia* in the Herakleopolite nome during the entire Roman occupation of Egypt has heretofore been another Abusir el-Melek cartonage document, 1198 (Busiris, 5/4 A.D.), wherein four priests complain that they have been charged 16 dr. apiece for the *laographia*. Hence, our knowledge of this tax in this area is just about nil.

The ethnic interest of this tax list lies in ll. 214–216. This sub-heading for the subsequent roster divides the civil population of the political entity involved into *catoecs*, Greeks and Egyptians: Τῷβι ἄλλης λογηας (l. -ίας) (δρ.) ι / κατοίκων καὶ Ἑλλήνων / καὶ Αἰγυπτίων. The indication of ten drachmas is obscure, since none of the succeeding payments in the ensuing 60-some lines ever exceeds one or two drachmas. One possibility is to assume that the ten drachmas represent the total sum assessed upon each individual for that year. Another is to associate this amount with the following word and assume the presence of 10-drachma-*catoecs* in the early Augustan Herakleopolite nome. However, in that case, one would expect ι (δρ.) κατοίκων and not (δρ.) ι κατοίκων. (10-drachma-*catoecs* are otherwise attested only once in 118 [Arsinoe, 189 A.D.], regarding which Wallace, Taxation 409.40, says, "There is certainly no indication of a 10 dr. rate of poll-tax in the Arsinoite nome.")

According to O. Montevicchi, *Aegyptus* 50 (1970) 23, *catoecs* in Roman Egypt are by and large an Arsinoite phenomenon, with relatively few coming from the Herakleopolite nome (P. Sarap.) where the designation seems to be more general and equivalent with γεοῦχος (Méautis, Hermoupolis-La-Grande, Lausanne 1918, 65.1; J. Schwartz, P. Sarap. 24.12 n.). So far only one *catoec* is attested in the Herakleopolite nome (P. Oslo. 98: 131/132 A.D.) where the designation seems to have a connotation similar to that of the Arsinoite occurrences. According to the entries in lines 214–216, the *catoecs* in the Herakleopolite nome of the early Augustan era are clearly distinguished from the rest of the population consisting of Greeks and Egyptians. However, in the ensuing list of names no attempt is otherwise made at designating who is *catoec* and who is not. Neither does there seem to be any distinguishing feature between the people paying one and those paying two drachma installments on their taxes.

While Wallace, Taxation, argues for the *catoecs*' poll-tax liability, C. Nelson, Status Declarations in Roman Egypt (= ASP 19), Amsterdam 1979, 38, argues for their exemption. Since, however, the pitifully few documents shedding any light on the

issue derive from the Arsinoite nome and date, generally speaking, several centuries later, they afford no help at all in deciding the status of the *catoecs* here in the early Augustan Herakleopolite nome and whether they were totally or partially exempt from the poll-tax.

Hence, the questions and issues this new tax list raises are for the most part *imponderabilia*: what is the status of these early Roman *catoecs*? Is it the same as the Ptolemaic *catoecs* or has Augustus already changed it by this time? What is the difference between the *catoecs* and the Greeks? Why are all these three lumped here together in one category (if there is no difference among the three in the end, why bother to make the distinction at all? Unless they are all lumped together here as payers of the poll-tax regardless of the rate). What was the poll-tax in the early Augustan era? Were there privileged classes either partially or entirely exempt from paying the *laographia*? (Cf. CPR VIII 20, a letter of unknown provenance from the 3rd c. A.D., which mentions Alexandrians, Romans, and *catoecs*.)

Onomasticians should take note of this list, for alongside its intriguing, but unfortunately all-too-fragmentary mention of *catoecs*, Greeks and Egyptians in Herakleopolis, it presents us with some 70 names heretofore unattested (indicated by an asterisk*), thus providing a rich, new, source of material on nomenclature in the early Augustan Herakleopolite nome. It is amusing to see alongside such obviously Egyptian, and for the accountant indeclinable, names as Otokulis (l. 45) or Tualis (l. 128) such stolid and venerable Greek names as Polydeukes (l. 53), Kastor (l. 222), Orpheus (l. 232), Diomedes (l. 137), Poliantes (l. 418), and even an Achilles, son of Atreus (l. 518). In l. 419 is Ammenneus, son of Pindar - Pindar in the tax-rolls! Sometimes (for example, ll. 72, 425, 517) the names give the impression of being feminine: Thnais, Thinochis, Theanubestis. Women are, however, nowhere attested as *laographia*-taxpayers. Provided that this list records poll-tax payers, these names are most likely those of men. Cf. such similar, apparently feminine names borne by men in P. Princeton 10 III 14: Taanouphis, son of Petemunis, 10 IV 23: Athenais, son of Heracles. See Pestman, Choachytes, pp. 485ff., on the Greek declensions of Egyptian names.

Literature on the *laographia* includes: Wallace, Taxation 116–134; *id.*, "Census and Poll-Tax in Ptolemaic Egypt," *AJPh* 59 (1938) 418–442; E. Kiessling, *Congr.* 5, 223ff.; C. Préaux, *L'économie lagide*, Brussels 1939, 381f.; *ead.*, O. Wilbour, pp. 28–33; H. Bell, *JRS* 37 (1947) 12–23; H. Braunert, *JJP* 9/10 (1956) 302–305; V. Tcherikover, *JJP* 4 (1950) 187.19–20; D. Tebt., pp. 4–7; D. Samuel, *Congr.* 16, 389–403; S. Omar, *Congr.* 18, vol. II 287–291; J. Shelton, P. Brooklyn 34 introd. On *catoecs*, see D. Canducci, *Aegyptus* 70 (1990) 211–255.

Various techniques are employed to indicate abbreviated names or words. 1) Supra-script letter. Names with *omega* in them such as Apollo-, Choros and Pete-chon are written up to the *omega* which is then placed over the preceding letter. 2) Simple omission, e.g. ll. 46, 163, 165, 177, 187, 222, 227, 257, 258, 261, 279. 3) *Haken-*

alpha. This is by far the most common method of abbreviating anything and everything, even where the letter *alpha* is not even remotely concerned. Hence, in the transcription (where applicable), this has been rendered as *alpha*. Otherwise, it has been rendered as the rest of the name or noun in parentheses.

- 1 It is obvious that no more than a few letters with the year of Augustus' reign are missing from the left. The remaining ink traces on the edge of the papyrus are unfortunately much too vague to begin to decipher.
- 2 In the column of numbers there is a long, vertical stroke whose meaning is elusive.
- 6 Delta has been corrected from alpha.
- 16 Cf. Πασινήμις.
- 17 = 217, where he is apparently in a different taxation class. According to its form Ταψάιτος would appear to be feminine, but it must be the name of the father. Cf. l. 64.
- 18 = vso 59.
- 19 Cf. Χορῆος and Mayser I.2, § 63 Anhang.
- 21 = 219: l. Ἀλιταί(ου) ?
- 25 Cf. 2674.228: Χῶλος Βαστ[.].
- 26 Λατης: The same name in ll. 91, 337; P. Tebt. IV 1139.5. The same man in 91? (brother of Adrastus; both sons of Paras; cf. l. 90).
 Παρᾶτος: The second alpha has been corrected from eta.
- 27 Κιλικᾶς: The name is attested in SB VIII 9904.3 (Antinoopolis, 154 A.D.).

- 31 Tau and epsilon corrected from sigma and omicron. Cf. ll. 68, 71, 233 for similarly constructed names. Do these forms which omit the intervocalic labial phi between the two vowels epsilon and omicron perhaps reflect the Herakleopolitan dialectic pronunciations?
- 32 = 295.
- 33 = 299.
- 39 = Fig. B col. II 9.
- 41 Cf. l. 257.
- 42 Cf. CRIPEL 1 (1973) p. 224, l.33: Νοβωνύχου; Pape: Ἀρβουπάλης.
- 43 Cf. H. Harrauer, CPR XIII, pp. 102-105; on horses in general: A. Hyland, Equus. The Horse in the Roman World, London 1990.
- 46 = 129, 382.
- 48 = 2674.95.
- 49 Man has been written over something else. Cf. E. Bernand, RIGF 61.1, on the meaning of this name.
- 53 = 249.
- 55 Πετεβεν(δήτιος): Attested in 1809.3.
- 56 Cf. Ἀνίκιος.
- 57 Since pastophoroi are not technically priests, they were liable to the poll-tax. Cf. H. Schönborn, Die Pastophoren im Kult der ägyptischen Götter (Beitr. z. kl. Phil. 80), Meisenheim am Glan 1976; A. Passoni dell' Acqua, Aegyptus 61 (1981) 176ff.; Kessler 86.7; E. Lane, Glotta 66 (1988) 100-123; P.W. van der Horst in: Studies in Egyptian Religion ... Zandee, Leiden 1982, 70.81; J.-J. Aubert, BASP 28 (1991) 113-118; and Pestman, Choachytes, p. 428.
- 58 = 152? ἡπητής: Pestman, Choachytes p. 442.
- 59 Cf. Pape, Ἰαπίς. The scribe, perhaps wishing to avoid the kollesis running through the roll at this point, left a space in the middle of the name and continued with pi, iota and sigma on the succeeding sheet.
- 63 Κελαδοῦ: Attested in Pape.
- 65 Not the attested name Ἀκοίφιος, but rather the same new name which also appears here in ll. 89, 232.
- 68 Ἀρυσση[.]: The first letter perhaps corrected from epsilon. Cf. Bernand, RIGF 181.2: Ἀρυσση[.].
- 70 l. -σίρις.

 Κρηκίτη[ς]: Thinochis is an inhabitant of the village of Krekis (cf. 2437.44, 2439.20, 62; P. Giss. 65.11: Κρηκείτης).
 Such word formations are widely attested, e.g. 2425.7, 27: Νωίτης; P. Tebt. I 90.35; 103 (p. 448); P. Tebt. I 112.122; II 347.18, 401.44: Ταλίτης. It is somewhat disconcerting that both Talites (SB 9693.73) and Onites (v. Pape) are also attested as names of people. Tabeutes (l. 503) is likewise problematical.
- 75 Νεχθεραῦτ(ος): The name of a deity in P. Grenfl. II 33.5 and W. Spiegelberg, Demotische Denkmäler II = Catalogue générale du Caire 39, Strasbourg 1908, p. 227.

2578–2587 Declarations of Sheep and Goats

In one fell swoop this cartonnage mummy coffin has produced ten early Roman small animal declarations from the Herakleopoite nome. Heretofore, only two (P. Oxy. Hels. 8; PIFAO I 5) were known from the period B.C., and two sole declarations were known from the Herakleopolite nome for the entire Roman period: VBP II 21 and P. Heid. IV 303 (cf. P. Heid. IV, pp. 76–79). With one exception (2586) from 5 B.C., they all date to the 17th year of Augustus (14/13 B.C.) and were submitted in the month of Mecheir. Apart from 2586 which is addressed to Apollonios, suborn of Herakleides, *strategos* and chief revenue officer, they are all addressed to Herakleides and Apollonios, suborns of Eireinaios, supervisor of the pasture-tax of the Herakleopolite nome for that year. Several of these new documents are collective ones and therefore similar to P. Berl. Möller 7 and P. Oxy. LV 3778.

The constituent elements in these ten new Herakleopolitan declarations are as follows: 1) a marginal note made in the registration office containing: the origin of the declaration, the official's certification that he has received the declaration, and the date; 2) the declaration itself consisting of a) the address (for the most part to adjutants of Eirenaioi ὁ πρὸς τῷ ἐννομίῳ); b) a tally of the animals and a formulaic description of their grazing activities; c) the request καταχωρίσαι τὴν ἀπογραφὴν; d) either a salutation or the date.

 8 οἰκιακόν: G. Horsley, NDIEC 3, no. 1 commentary, cites other examples of this word in the papyri; however, examples in animal declarations are lacking. This would seem to be an animal kept at home, separate from the others, perhaps as a pet. Cf. C. Gorteman, CdE 32 (1957) 101–120, on the Egyptians' interest in animals. Animals are often greeted in private letters from the pharaonic period down through the Coptic one (*pace* C. Tsiparis, O. Lund 14.3 n.) Cf. Olsson, Papyrusbriefe, p. 195, citing numerous examples; P. Mich. VIII 482.12 n.; O. Theb. Copt. 36; P. Oxy. XIV 1772; O. Amst. 18.2; O. Florida 15.2, 18.4; BSAC 24 (1982) 10.  13–14 ἄρνας ἐρ[ί]φους: On the asyndeton cf. E. Boswinkel, P. Lugd.-Bat. XIX 8.2–3 n. J. Rea, P. Oxy. 3778.26, cites further parallels.
 14–16 Most similar to the wording in these Herakleopolitan declarations is that of Oxyrhynchite documents: ἃ νεμήσεται περὶ ... καὶ δι' ὅλου τοῦ νομοῦ. In Arsinoite documents one finds: ἃ καὶ μετάξω οὐδ' ὅπου ἂν αἰρῶμαι. In Hermupolitan ones: κοίτη (κοίτης) ὅλου / παντὸς τόπου. D. Hagedorn, ZPE 21 (1976) 159–167, has analyzed these and other formulations typical for individual nomes. The new Herakleopolitan documents have a characteristically distinct wording, different from all the others, which still serves to assert the same rights: to pasture the animals wherever in the nome the owners so choose. These rights are guaranteed by the fact that they have paid the ἐννόμιον for that year. Cf. D. Hagedorn, *op. cit.* 161, citing Wallace, Taxation 86–88.
 16 κατα]χωρίσα[ι]: Cf. H.C. Youtie, BASP 15 (1978) 179–183.

Translation

To Herakleides and Apollonios, (suborns) of Eirenaïos who is in charge of the pasture-tax in the Herakleopolite nome (for the 17th year of Caesar), from Dionysios, son of Dionysios, one of those from Shepherds' Village. I register for the present year the forty-five miscellaneous adult sheep and one pet (?) belonging to me, *in toto* forty-six, as well as the three goats mixed together with the sheep of Horion, son of Psenesis, and of Hermias, son of Aristomenes, as well as this year's accompanying lambs (and) kids pasturing, watering and abiding around the village and throughout the nome. (If it should please you, record) the registration, as is the custom.

This declaration presents by far the largest number of sheep and goats ever registered for one individual. In other documents recording hundreds or thousands of animals, apparently corporations or sometimes even whole villages are involved (e.g. P. Wash. Univ. I 1; P. Berl. Möller 7, P. Hamb. I 34; P. Oxy. Hels. 8). Individuals rarely declared hundreds of sheep (e.g. P. Amh. 73; P. Hamb. I 34). Cf. C. Balconi, *Aegyptus* 64 (1984) 43-44.

Margins: left 0.8 cm., lower 4.3 cm.; right: variable. Interlinear space between lines 2 and 3: 4.5 cm. Except for a thin strip on the right, the upper third of the papyrus has broken off. The document in question, however, occupies only the lower third of the papyrus. In the upper left corner are remnants of an account written in a different hand. One gets the impression that someone used the space at the end of an account and at the bottom of a larger sheet of papyrus for writing his cession of land. The document is written in a script very similar to that of 2591. On the verso are faint traces of an account arranged according to days.

Soterichos, son of Aphrodisios, swears that he will cede his claims on ten aruras of land in Ponches's tract to Herakleios, son of Herakleides. Unusual and inexplicable is the exact nature of the relationship between Soterichos and a certain Herodes, son of Herodes (ll. 6-7). Taking the Greek preposition εἰς in line 6 at face

value gives the impression that Soterichos has the land *for* Herodes, as if he were holding it in safe-keeping for Herodes who might be a minor or otherwise incapable of assuming full possession of the land for himself.

Parallel documents are numerous, e.g. P. Tebt. 380; P. Mich. 350-352; P. Lugd.-Bat. XIX 10; SB XII 10880, 10881, 11233. Demotic parallels: Pestman, Recueil, pp. 6ff.; K.-Th. Translation

I, Soterichos, son of Aphrodisios, one of those from the village of Techthoi, verily swear by Caesar Emperor, Son of God, that I cede to Herakleios, son of Herakleides, the ten aruras belonging to me for Herodes, son of Herodes, in the tract of Ponches, and that neither (I) nor any of my sons nor any other on our behalf shall prosecute him, otherwise I shall expel (him) at my own expense. May it be well for me if I swear truly; if I do not, then the opposite. Year 2 of Caesar, Mesore 12.

The village elders of Korphotoi swear that they will undertake the upkeep of three canals near the village and in an accompanying document on the same sheet of papyrus acknowledge the receipt of 120 silver drachmas in funding for this work. For further discussion on the implications of this document see BASP 16 (1979) 25ff., where this papyrus was first published. In the meantime a small fragment has been added to the lower right corner of the document on the left and several readings improved.

the west of -nios' garden - that we will dig (them) out and ... night and day ... until the river recedes ... acting (as mutual guarantors for each other) May it be well with us if we swear truly; (if not, the opposite).

It was written by Theon, *monographos*, (because) they say they are illiterate. Year 5, Mesore 8.

Hatres, son of Harpaesis; and (his) brother Harsisois; Ladamas, son of Pelasis; Harsiesis, son of Horos; Hatres, son of Semtheus; and Semthonaes, son of Menches, inhabitants of the village Korphotoi, to Herakleios, *toparch* of Agema. We acknowledge having received from you through the public bank of Arios, for the maintenance of the three canals near the village which we have specified in writing, one hundred and twenty silver drachmas, total 120 dr., for which we will duly work, and we will not start any prosecution.

The object of concern here is a run-down house worth 80 silver drachmas, seemingly part of an inheritance. However, given the abraded state of much of the papyrus and the ambiguous forms of some of the letters, so far it has proved impossible to determine what is happening to the house.

Dionysodoros, son of Dionysodoros, from the nome capital but for the time being residing in Phys, has built himself a house using persea wood to do so. It is in this regard that he swears an oath, the contents of which are for the most part lost. Considering what we know about wood in Egypt in general and the persea tree in particular, Dionysodoros probably either swore to reforest the tract of land where the persea trees grew or else to pay a fine for having illegally felled them.

Judging from the length of the lacunae in lines 2 and 10 (*ca.* twenty-five letters from the left), at least half of this papyrus is missing. However, there is scant hope of ever recovering the missing portion, since it seems to have been destroyed by

embalming fluids. Nonetheless, the wording of this text is so intriguing – and obscure – that it deserves publication despite its fragmentary state.

- 1 Φεβίχεως τῶν στρεβλωτῶν: It seems only a remote possibility that the usual and already well-attested village Phebichis should here be called "Phebichis of the torturers." More plausible, considering the scribe's idiosyncratic orthography, is to assume either a grammatical or syntactical irregularity – or *lapsus calami*.
στρεβλωτῶν: According to LSJ the word is attested only in the glossaries with its Latin equivalent *eculeus* "torture rack." The sole cognate word in the papyri is στρέβλωσις in P. Oxy. 3430.24-25 and P. Mert. I 45.4. See in general Hug, "Rota," RE IA,1, 1151-1152, and J. Henderson, Aristophanes. Lysistrata, Oxford 1987, 175.
- 2 Ἄυτοκράτορα: The only oath where this word appears at the end is P. Tebt. II 382.21: ὁμνύο Καίσαρα Θεοῦ υἱόν Ἄ. – cf. C. Balconi, Aegyptus 56 (1976) 214. Presumably something like this once stood in the lacuna here.
Comparing the lacuna here with the one in l. 10, one arrives at the sum of *ca.* 25 letters missing from the left.
- 3 ἡ κατοικοῦ(ν)τας: Cf. G. Horsley, NDIEC 5, p.143, for parallels.
- 6 ἡ ἐβτομήκοντα.

Margins: upper 1.5, left 1.5, right negligible. Verso blank.

Ten men, probably hunters and residents of the village of Chennis, have evidently sold their share of half a house to Triadelphos, son of Hareotes, and acknowledge having received from him twenty silver drachmas in payment. Although the transaction itself is banal and offers little to commend it, the heading attracts immediate interest. This fragmentary document proclaims itself as the copy of a Greek transla-

tion of an originally Egyptian (= Demotic) contract of agreement probably for judicial purposes (cf. U. Wilcken, UPZ I, p. 602, II, p. 129; Meyer, Papyri, pp. 78,82; F. Griffith, P. dem. Ryl. III, pp. 118ff.). Even without this heading, the blatant Egyptisms in the Greek wording would have betrayed it as such – cf. lines 3 and 4 nn.

Herakleopolis

Margins: upper 3.7, left 0.8, lower 1.7 cm. The same script as on 2670. Verso blank. Dorion, the royal secretary, writes to the district scribes, appending copies of letters from the prefect and *strategos*. Unfortunately, only the copy of the *strategos*'s letter is preserved here. The subject under discussion is the inspection of the finance records "from times past up to Augustus's third year" (line 4). It would be nice to know exactly what length of time was involved here – and how many of Augustus's Ptolemaic predecessors' records were up for inspection. Certainly, more than just the records of the first two years of Augustus' reign would have

been reviewed. Other *imponderabilia*: what was the occasion for this inspection in the 16th year of Augustus's rule? Were Dorion and other officials addressed in this letter already in office in Augustus's third year – perhaps already in office even at the time of the Roman conquest? If so, were they now, thirteen years later, being summoned to account for themselves because of some irregularities in the books?

2–3 [Βαρ]βάρου: The few extant sources on the life and career of P. Rubrius Barbarus are in the *Prosopographia Imperii Romani* and ZPE 17 (1975) 268. So far the only attested dates for his prefecture were all for the year 13/12. This text from 15/14 is an exception. Cf. 2558 and Geraci, Genesi 174ff. on early Roman prefects in general.
4–5 For similar wording cf. P. Amh. 68.4; P. Oxy. 1188.5,11. The participle refers to the district secretaries who are obliged to reveal everything and to conceal nothing.
7 [Λύπος?]: Cf. 2602.6 and 2669 II 1 where a certain Lupus, *strategos* of the Herakleopolites in Augustus's 17th year appears. His short name would nicely fit and fill in the lacuna here and in l. 1.

8 κατὰ συνήθειαν: Cf. H. D. Schmitz, *Tò ἔθος und verwandte Begriffe in den Papyri*, Diss. Cologne 1970, 73ff.
l. εἶδους: In P. Köln IV 195 Einl., 195.20, 228.16, this word seems to designate market vendors. N. Lewis, BASP 18 (1981) 126–127, however, notes the broad scope of meaning this word had in Koine Greek, equivalent to the English "item." That is most likely its meaning here.

8–9 ἔ[τι δὲ καὶ νῦν προσέ]νεγκε *aut sim.*? Although the *iota* is unmistakable, this document is after all a copy and, considering its other orthographical and syntactical errors, a rather poor one at that. Hence, a *gamma* in the original might easily have been misread as *iota*.

Preserved are portions of two receipts: 1) Herakleios, son of Apollonios, certifies that he has received from Aspheus, son of Horos (cf. l. 9), rent payments for two years on a field, half of which Aspheus has cultivated. Herakleios has paid the taxes due. Claims on a loan which he gave to Aspheus and which is up for repayment in the following year are still valid. Further agreements regarding canal and dike work are lost for the most part. Peculiar is the lack of stipulations regarding the type of rental involved here. There is no mention of the sum, nor whether it involves money or goods. 2) Soterichos, son of Herakleios, (probably the landlord of the first document), certifies repayment of the aforementioned loan. In l. 21 one learns that it is a mere prepayment of the rental fees. Soterichos maintains his claims on the rental payments on the other half of the field which a certain Adras-tos cultivates.

- 14 ἄξεις: Cf. **2590** I 6-8: ἄξιν καὶ στεγνώσειν καὶ παρυλιεῖν τὰ ... δημόσια χώματα. ἀπὸ Μεχέιρ: January 26 – February 24. Both the bulk of the penthemeros and naubion receipts and the evidence from private documents indicate intensive work on the canals during the Nile's inundation between June and August (cf. Schnebel; Sijpesteijn, Penthemeros 10-11). Only a few references to canal work in Mecheir are known. The water level of the Nile was then at its lowest point, hence maintenance work on the dikes and canals was not of such emanent priority. However, cleaning and repairing was considerably easier (Sijpesteijn, *op. cit.* 11). It is probably for this reason that Herakleios stipulates that the work be executed during this period.

16, 21 ἰ. δανείου.

- 20 Cf. P. Cair. Isid. 114.4-5: ἔσχον παρὰ σοῦ τὸ ἐπιβάλλον μοι μέρος ὧν ἐγεώργησας κτλ., where τὸ ἐπιβάλλον μοι μέρος similarly serves as circumlocution for the rental fee.

- 23 There is no place for Adrastos's father's name in the lacuna. Hence the article must serve to introduce some other substantive.

Because of irregularities in the survey and the ensuing evaluation of their property, three farmers from Kephelai address their appeal for justice to Theon, the royal secretary. They claim to possess seven aruras apiece which have been only partially inundated. Furthermore, they suspect and accuse a certain Zenon of inaccurately surveying their land, hence placing them in a higher tax bracket than that in which they rightfully belong.

To Theon, royal scribe, from Panetbeus, son of Horos; Harondotes, son of Harondotes; and from Psenobastis, alias Benipis, the three from Kephala. Near the village of Taphthiris are three plots of land of seven aruras each belonging to us on which we have faultlessly paid the customary taxes and dues. In the fourth year only three-quarters of each plot was inundated, resulting in a total of $2\frac{1}{4}$ aruras. Registered $1\frac{1}{3}\frac{1}{4}$... Zenon, the *topo-* of the district, in collusion with A-, the ... scribe, made an incursion on our houses and surveyed ... with regard to the aforementioned $2\frac{1}{4}$ aruras ... in desuetude and ... in disorder. We therefore see ourselves compelled to come to you for refuge. We beseech (you), (if) it seem fitting to you ... since we are assessed more than the customary taxes, in order that we may enjoy your succour. Farewell.

The Archive of Athenodoros

For convenience I have designated the following group of documents with this title because most of the documents center around the person with this name. Even in the few instances where his name does not appear, the documents in question are written either by the same scribes who wrote letters to or from Athenodoros, or they concern people associated with him in other documents that bear his name.

Athenodoros apparently was sometimes addressed with the more familiar Athas (2621, 2647, 2654.13, cf. Vergote 3 and J. Winnicki in: *Life* 352.6 on this name). Cf. R. Merkelbach, ZPE 55 (1984) 54: “Δωσῶς ... ist eine Kurzform zu Δωσίθεος”; Olsson, nos. 12–14, introd. p. 56 (Akus = Akusilaos); E. Husselman, P. Mich. V, p. 15; G. Horsley, NDIEC 4, nos. 5 and 101, comm.; S. Omar, P. Soterichos 3.3 n.; H.C. Youtie, ZPE 21 (1976) 193ff.; A. Henrichs, L. Koenen, ZPE 32 (1978) 125–126; *id.*, APF 33 (1987) 58; A. Debrunner, *Griechische Wortbildungslehre*, Heidelberg 1917, § 23; E. Locker, “Die Bildung der griechischen Kurz- und Kosenamen”, *Glotta* 22 (1934) 89ff.; L. Koenen and S. Omar in: P. Turner 21, introd., p. 103.3; H. Heinen, ZPE 79 (1989) 244; W. Crönert, *Kolotes und Menedemos* (= SPP 6), Munich 1906, repr. Amsterdam 1965, 16; P. van Minnen, ZPE 93 (1992) 203.20; P. Oxy. 3094.1 n. (Eutyichidas = Eutyches); “Names, Hypocoristic”, in: David N. Freedman, ed., *The Anchor Bible Dictionary* IV, New York 1992, 1017ff.

Some of the more significant documents which reveal Athenodoros's character and career are the following:

2602: Athenodoros here functions simultaneously as *epistates* and *dioecete*.

2615–2618: These documents are of prosopographical interest, telling us about Athenodoros's family. Some of the information is ambiguous and inconsistent, since common familial terms of address may not always be true indicators of biological relationships.

2615: Here we learn the names of Athenodoros's parents: Menelaos and Herakleia – provided that Menelaos and Herakleia are in fact addressing their biological son and not just employing the Greek word for son as a term of familiarity.

2616: A brother, Onnophris, as well as a niece (?), a sister, another brother, Tryphaina and dear Herakleides are mentioned in this letter.

2617, 2618: In these letters not Menelaos and Herakleia but rather a certain Tryphas addresses Athenodoros as son. However, this may be a mere term of endearment, with no deeper significance than the somewhat more common ἀδελφός or πατήρ. Tryphas, reports to her son the delivery of a load of wood and pots and greets her daughters, Tryphas and Artemis.

Athenodoros is attested as *dioecete* in: 2603.1, 2608.11 (ca. 7 B.C.), 2619.12, 2622.2, 2624.2, 2631.1, 22 (March 2, 9), 2632.1 2633. 10, 2639.13 (10/9). See on the *dioecete* in early Roman Egypt: D. Hagedorn, YCS 28 (1985) 188; P. Col. VIII 211.

Athenodoros is attested as *epistates* in: 2601 (ca. 14/13 B.C.), 2606 (7 B.C.), 2637 (3/2). Other *epistatai* are Petesuchos and Soteles in 2657 (17/16 B.C.) and Heras in 2613 (15/14).

2625: This is one of the more interesting letters, remarkable for its virulent attack on Athenodoros. The correspondent, an otherwise unknown Achilles, minces no words telling Athenodoros what he thinks of him and his usual lassitude and lackadaisical manner.

In 2644 of June 4 B.C., Athenodoros is addressed as ἐμπολαῖος, “merchant.”

In 2662 and 2664 of July 11, 4 B.C., Athenodoros is called *phrontistes* of Asklepiades's property in the Herakleopolite nome. Cf. 2605.2

Another one of the more frequently appearing and relatively important personages in this correspondence is a certain Seleukos. In 2600.10–11 of August 4, 13 he is designated as *dioecete*. In the other letters where he appears no title is attached to his name (2612, 2613, 2614, 2629, 2634.1).

Striking in the otherwise banal wording of these everyday letters written by small people concerning their petty concerns is the occasional neologism or solitary attempt at sesquipedalian phraseology. For example, 2613.7: παροπλιεῖς, 2622.15: διπλῇ [ἡ] χάρις γένηται, 2623.9: ἐπισχίσαι τ' ἀνδρῖ[α], 2624.6: καταναβαλοῦμαι, 2625.19: καὶ ταῦτ' ἐν βίῳ; the unusual and unexpected word 2631.11: ἄτερ; 2644: ἐμπολαῖος; 2657.19: [εὐ]προσωπία; 2601.23–24: θεοχολοσία

Ladamas and the other beekeepers in the village of Choinothmis turn to an unnamed *epistates* (possibly Athenodoros who functioned as *epistates* about this time—cf. 2602) seeking redress for wrongs suffered seven years previously in regard to their tax payments. Evidently doubt had been expressed whether they had rendered all the honey that was due to the state back then. The beekeepers have already given their accounts of that period to the *epistates* for his audit. They now request that he submit them to the *dioecete* Seleukos so as to prevent their being assessed a second time. Should any questions or doubts as to their honesty or good intentions arise, Ladamas and the other beekeepers express their willingness to offer further proof of their claims.

20 vso: τῷ θεῶι καὶ κυρίῳ ἀντιλήμπτορι

- 1 Λαδάμας: The name is new in the papyrus documents from Egypt, although it appears in Pape. Cf. 2590 I 1, II 2.
μελισσοῦργοί: R. Sullivan, BASP 10 (1973) 8, and H. Harrauer, CPR XIII, pp. 129-132, discuss beekeepers in Egypt. Such wording as οἱ μελισσοῦργοί οἱ ἐκ τοῦ Ἀρσινόιτου νομοῦ (P. Cair. Zen. 59467) and that here indicate some sort of organization on the part of the beekeepers. On beekeeping in general, see E. Crane, The Archaeology of Beekeeping, Cornell Univ. Press 1984; E. Neufeld, Orientalia 49 (1980) 30-57, esp. 52.71; H. Chouliara-Raios, L'abeille et le miel en Egypte d'après les papyrus, Ioannina 1989; I. Beavis, Insects and other Invertebrates in Classical Antiquity, Oxford 1988; Schuster, RE 15, 364-384. On bee-keeping see B. McGing, P. Dublin, p. 60.
- 2 Χοινώ[θ]μεως: Attested in P. Hib. I 68.3, 112.16,86; SPP X 8, etc.
- 3 θεῶι καὶ κυρίῳ: The same idiom in 1197.1, 1201.1; cf. 2601.25; 2604.1-2; 2631.1; 2638.1; OGIS 195. H.C. Youtie and J.G. Winter, P. Mich. VII 466.4 n., discuss the tendencies for apotheosis in private letters of this period; A. Hanson, ZPE 47 (1982) 234.4, the deification of officials. Cf. A.D. Nock, The Joy of Study. Papers ... F.C. Grant, New York 1951, 142-143 = Essays on Religion and the Ancient World II, Zeph Stewart, ed., Oxford 1972, 732-733. Examples in classical literature include: Seneca, *Epist. Mor.* 108.33-34 (Scipio); Lucretius, *de natura* I 62f. (Epicurus); Vergil, *Ecl.* 1.6-7 (Augustus). ἀντιλήμπτορι: Cf. 1138.19, 1139.17, 1182, where the word is applied to various officials.
- 7 ι. σμῆνων: See Gignac, Phonology 122 and P. Oxy. 3410.10-11 n., on the spelling with zeta. Bee hives represented a considerable investment. Hence, they are included in a temple inventory (P. Cair. Zen. 59520) and in a list of pawned objects (P. Hib. II 197.7); cf. Sullivan, *op. cit.* 9-10. Evidently the taxes involved here were calculated according to the number of bee hives in the beekeepers' possession.
- 7-8 Sullivan, *op. cit.* 8-9, cites evidence for beekeepers paying taxes either in money or in kind in Ptolemaic and Roman Egypt. The beekeepers here maintain they paid taxes in the eleventh year of Augustus's rule, and they are able to produce receipts to prove their claims.
- 9 ι. φαίνεται.
- 10-11 Σελεύκῳ τῷ διοικητῇ: Seleukos, who frequently appears in the correspondence of Athenodoros (2612, 2613, 2614, 2634), is attested only here as *dioecete*.
- 12 ι. συμπροσ-.
- 15 ι. τὰ δὲ, τὰ γὰρ or οὐδὲ τὰ σύμβολα ἔχομεν. For the most recent discussions of *symbola* in the papyri see J. Herrmann, Congr. 15, 222-230; P. Verdult, P. Erasm. II, pp. 99-106; 2391.16-17 n.; and G. Casanova, Aegyptus 18 (1988) 17.

- 17 [παρὰ] πάντα: See **2617.7** n.
χαριῇ: Cf. **2417.6–8**, **2422.8**.
- 18 ἰ. ἡμῖν.
- 19 εὐκτότ[ατον·]: Cf. **2622.25**, **2617.8**; P. Mich. VIII 466.3: [εὐχομ]αί σε ἔρρωσθαι, ὅ μοι εὐκτόν ἐστιν.
- 20 Above the *mu* is another letter (*kappa* ?) written with darker ink and finer strokes, most likely a blot from another document.

Ladamas and the other beekeepers from Choinothmis to the most respectful god and lord, protector, many greetings and constant health, as we pray for (it). We sent you the record regarding the bee hives and the honey measured in the 11th year. If it so please you, most respectful *epistates*, show them to Seleukos, the *dioecete* and lord, assisting him, so that – on the basis of the record and the honey measured – we be assessed no more than at present. (For) we have the receipts. When that has happened, then we will have been rescued by you. At any rate, you would do us a favor, by taking care of yourself so that you remain healthy – which is our sincerest wish. Farewell. Year 17 of Caesar, Mesore 11. Verso: To the god and lord protector.

Margins: upper 4.5, lower 8, left 2.5 cm. The upper fragment (P. 25261 = lines 1–21) is poorly preserved: torn and missing fibers at the top of the document have taken with them much of the context necessary for understanding who the parties involved were and to whom this complaint was addressed. At the bottom the same fragment is shredded and stained. P. 16899 (= lines 22ff.), by way of contrast, is in excellent condition. Even the upper edge is neatly cut off. The remarkable differences between the two sections of the same document, indicating that they have undergone quite different vicissitudes in the last 2000 years, suggest that the petition was cut in two and the two pieces put into different sections of the same coffin during the manufacture of the mummy case in antiquity. How much is missing between the upper and lower fragment cannot be determined any more. The verso is devoid of writing.

Unfair business practices are the subject of the present complaint. Someone leased a parcel of grain-producing land in the firm belief that he was getting 15 aruras in the deal. Undertaking his own survey of the land, he discovered it measured only 9 aruras – but not before he had already paid taxes on 15 aruras! Understandably and righteously indignant, he requests immediate redress for the wrongs perpetrated.

The farmers in the village of Techtho write to Athenodoros, who here functions simultaneously as *epistates* and *dioecete*, to inform him that a certain Eros, a functionary of the *strategos*, has attempted to coerce them into canal work. Fortunately for them, one of Athenodoros's men was able to put a stop to it. Still the farmers are not satisfied with this measure and demand a written guaranty from Athenodoros that Eros will not bother them in the future.

The work on the canals which is the subject of heated dispute here is obviously not the same as the well-known penthemeros system which was introduced only much later (P. Sijpesteijn, Penthemeros 1–5). At the time this petition was written canal work was apparently performed by workers who were paid out of public funds requisitioned expressly for the maintenance of the water ways (cf. 2590 and BASP 16 [1979] 25ff.).

Stilbon (?) to Athenodoros, the god and lord, greetings and prosperity. Recently, as I was out and about, while I was near Thaubarion's tower the slave Chrysippos and Skalphos attacked me and coerced me with beatings and blows into the city. If it please you, write to Skalphos about the ship and about me, so that he release me with the ship. Skalphos chides you and says, "I have received no letter from you". I therefore beseech you, write to Skalphos so that he may release me sooner, because your sister wants to come up on the ship. Regarding that which the ship has (= the cargo, freight), I have told all the ships' captains that they should bring it to you – also from that which they have sold. This is this letter. Farewell. On July 23, Sotas writes to Athenodoros, in his capacity as *epistates*, about several matters on his mind. Although he was employed on a ship already in the month of Phamenoth (February 25–March 26), Sotas has calculated his wages only from Pharmuthi (March 27–April 25). So far he has only received wages for Pharmuthi and Pachon (April 26–May 25), although it is already the end of July. The wages from the last two months are still due him. He requests Athenodoros pay him the outstanding wages immediately, otherwise he will be unable to pay his employees. Sotas furthermore asks Athenodoros to return his ship to him. Most intriguing in this letter, mentioned only *en passant* without any further elaboration on the whys and wherefores, is Sotas's comment that he is being held prisoner in a temple.

This papyrus was reproduced and briefly described in the booklet: Museum. Ägyptisches Museum Berlin. Staatliche Museen Preussischer Kulturbesitz, Braunschweig: Georg Westermann Verlag 1981, 1984, pp. 104, 105.

References to imprisonment in temples in Egypt are few and their interpretation difficult. K. Sethe, "Sarapis ...", Abh. d. kgl. Ges. d. Wiss. Göttingen, phil.-hist. Kl. n. F. 14.5, Berlin 1913, 91f., discusses instances in pharaonic and Ptolemaic Egypt. He was able to cite only one instance from Roman Egypt (P. Oxy. 259 = Mitteis, Chrest. II 101 = M. Biscottini, Aegyptus 46 [1966] 186–189). Cf. D. Lorton, "The Treatment of Criminals in Ancient Egypt through the New Kingdom," in: J.M. Sasson, ed., The Treatment of Criminals in the Ancient Near East, Leiden 1977, 2–64; Wilcken, UPZ I, p. 15, made a strict distinction between detention in temples and prisons constructed within temple enclosures, the latter being civil jails having nothing to do with the temples themselves. On Egyptian prisons in the Byzantine period see J. Gasco, Travaux et Memoires 9 (1985) 24.

Why Sotas is being detained in – of all places – a temple is a matter he enigmatically passes over in silence. That he was a κάτοχος seems out of the question. (On the *katochoi* see Kessler 141–142; R. Scholl, "Ἱεροδούλος im gr.-römischen Ägypten", Historia 34 [1985] 466–492; W. Clarysse, Enchoria 14 [1986] 43–49; G. Kortekaas, ZPE 85 [1991] 78.20: bibliography.) His involvement with ships and shipping is quite incongruous with anything religious.

On temples as prisons and places of detainment see J. Whitehorne, ANRW II 18.5, 3067; U. Wilcken, UPZ I, pp. 61, 131, 359, 363, 653; A. Bowman, P. Oxy. 3249.12 n.; Otto I, 285.3; Woess, Asylwesen 126; J. Ray, The Archiv of Hor, London 1976, 162. On prisons in general: R. Taubenschlag, Op. min. II 713ff.; P. Harr. 65.8; E. Boswinkel, P. Lugd.-Bat. XXIIA 12.17 n.; D. Hagedorn, J. Shelton, ZPE 18 (1975) 225ff. Prison terms in Ptolemaic and Roman Egypt vary from five months (P. Lond. VII 2045.2–3; P. Tebt. III 777.8–10), to ten months (Mitteis, Chrest. II 5), to one year (PSI IV 347.8–10), to three years (P. Coll. Youtie 12).

Translation

Sotas to Athenodoros, *epistates*, greetings and continual health. You should know that I have been on board the ship since Phamenoth. However, I am calculating my salary only since Pharmuthi. I have received (my salary) for Pharmuthi and Pachon, (not), however, for Payni and Epeiph. Please be so kind as to pay me (the outstanding sum) for the two months, because of the hindrances encumbering me and because of my anger at being shut up in the temple. For I am paying the hired men up to Mesore 1. I beseech you and beg you to return to me the ship – whichever one you decide, for you are the owner. Otherwise, take care of yourself and stay healthy. Farewell. Year 23 of Caesar, Epeiph 29.

Margins: upper 6.5, left 1.5, lower 1.5, right negligible. Sotas, evidently a kind of agent for Athenodoros, writes how he is involved in getting timber shipped. Given Sotas's particularly obscure choice of words (neologisms?) and idiosyncratic orthography, much remains to be elucidated in this letter.

Sotas to (his) brother Athenodoros, greetings and continual health, since I so wish it. Having been separated from you I went to Poimenon and stayed there six days. By your good fortune I was able to claim all (my debts?) there. I only cut one (tree?) ... he did not observe it. But I am in trouble ... (11f.) neither did he send the wagon, selecting first of all the things in the house's courtyard. Know, therefore, that the large persea tree in Phnebieus is lying on the "plate". I have calculated the breadth at 7 cubits and the length at 14 cubits. The things are lying in the hall in the courtyard. No one has taken anything. For you do not have such a one in the nome worth 600 drachmas The others have received, and the builders have paid the wages. I, therefore, write you so you know not to delay. Farewell. Herakleides writes Athenodoros about problems he is having with recalcitrant beer brewers in Tilothis. The brewers have not yet milled the barley for the beer, and it does not seem they are about to do so, unless Athenodoros is willing to fork over more money (if one may extrapolate this interpretation from the garbled context of lines 3-5). Herakleides warns Athenodoros to direct his immediate attention to the matter; otherwise, the whole operation will be for naught.

- 1 Ἡρακλείδης: Possibly the *strategos* of the same name in 1188.1 and 2586.2, since it was the *strategos* who issued such letters of protection (Woess 188).
2 -εις corrected from -ις. Cf. E. Boswinkel, P. Lugd.-Bat. XXIIA 11.31 n. on the use of the plural in such letters of guaranty.
3 πρὸς ἡμέρας τρ[ε]ιάκον[τ]α: Olsson 47.7-8 n., cites Heb. 12.10: πρὸς ὀλίγας ἡμέρας and Clemens, *homil.* XX 15: πρὸς μίαν ἡμέραν. Cf. 2655.23.
3-4 Aspheus enjoys immunity only in regard to his private debts; he can still be called to account for overdue taxes.
The *mu* in δημοσίων has been written over.
4 The parallels make it likely that in SB I 1414.5-6 = P. Alex., p. 14, instead of ἀπὸ τῆς ὑποκειμένης ι [Φ]αῶ[φι.] ὑπ' οὐδενὸς one should probably read ἀπὸ τῆς ὑποκειμένης ἐ[ν] αἷ[ς] ὑπ' οὐδενὸς κτλ.

Herakleides to Athenodoros, many greetings and continual health, as I pray. I have read what you wrote. You do not write, however, what measure I should use for transporting to the city. If you are going to ship grain from the first harvest to Alexandria, let me know. A wholesale merchant (?) came to me in Busiris because of 500 artabs of wheat for 200 drachmas. He may tell (you about it ?) at (your) place (= in person). Let me know tomorrow in Busiris how it is with the measure there. I am going tomorrow to Tilothis to give the wholesale merchants letters (?) ... so that I may sell, if others come. Let us not hold back the wholesale merchants in any way. Otherwise, take care of yourself so you stay healthy. Farewell. Year 21 of Caesar, Choiak 20.

Let me know for sure tomorrow about the measure and about the merchant. Write to me in Tilothis. Send sacks. We are required (to pay) 4 drachmas as transport fees for a hundred artabs.

- 3 ἄριστα ἐπανάγειν: This expression is frequent in the Athenodoros archive. Cf. Olsson 18.12. R. Bagnall, BASP 6 (1969) 85 and U. Wilcken, UPZ 60.15 n., cite other occurrences of the relatively rare *ἐπανάγειν*. Wilcken analyzes such parallel expressions as *ικανῶς*, *στενῶς*, *μετρίως ἐπανάγειν* and comes to the conclusion that the verb "*in ganz abgeblasster Bedeutung geradezu für ἔχειν 'sich befinden' steht. Die zugrunde liegende Bedeutung des Verbums dürfte aber die des 'sich Erholens' sein ... Hiernach würde verständlich sein, dass Adverbien wie die obigen damit verbunden werden, nicht βέλτιστα, ο. ἄ*". Here, however, contrary to his impressions, is the superlative *ἄριστα*. Cf. Olsson no. 18.12-13: τὰ ἄριστα πράττων. Cf. 2619.2 and Plato, *epist.*, *passim*: εὖ πράττειν.
- 5 μέχρι οὗ: Cf. Olsson 19.7 n. (= 1204.7) on this construction without ἂν.

The sole interest of this shabby fragment is prosopographical, for in it we learn the names of Athenodoros's parents: Menelaos and Herakleia – provided that Menelaos and Herakleia are, in fact, addressing their biological son and not just employing the Greek word for son as an indiscriminate and general term of familiarity.

- 1 Τρυφᾶ[α]: Cf. **2618**. 1 ≠ **2615.2**, where Menelaos and Herakleia address Athenodoros as their son. F. Preisigke, P. Strasb. 2.1 n., considers the word υἱός in such salutations as fictive, a mere term of endearment, with no deeper significance than the somewhat more common ἀδελφός or πατήρ.

l. ἑμαντοῦ? One is inclined to emend, since Tryphas is a man's name. In l. 6, however, one of the daughters is also named Tryphas. Furthermore, in **2618** a certain Tryphas writes to his or her son Athenodoros using feminine participles (l. 13: εὐρουμένη καὶ ἐνεχυρασαμένη). Presumably some sort of linguistic confusion is at play here resulting in these errors of gender.

Tryphas addresses this letter to Athenodoros and his sister Artemis but consistently employs only second person singular pronoun forms throughout the letter, thus implying that it is mainly Athenodoros to whom this letter is directed. Tryphas complains to Athenodoros that the grain, which Athenodoros was supposed to have sent, has not yet arrived. Furthermore, because Athenodoros has not paid certain fines, some of the slaves are still being held in prison and will probably die as a result of his negligence. Two bailiffs are daily harassing Tryphas to pay the money. In a final note of paternal/maternal concern, Tryphas cautions Athenodoros to lock his grain away, giving none of it to anyone. The price of grain on that day has already gone up by three obols, and there is widespread fear it may increase even further.

Tryphas to son, Athenodoros, and daughter, Artemis, greetings and continual health. You should know that I have not yet received the grain which you sent me. For I understand it was not expedient for me to get it. Therefore, order it to be sent.

You have not paid the fines. No one can free the slaves. Every day I am harassed by the two bailiffs, Sokrates and Elemmon, because I am found owing. I have written to you often enough to see to the slaves. They will die in prison!

You will do well to listen to me and lock up your grain, giving nothing to anyone. For it went up by three obols on the fifteenth, and they fear it will become even more expensive. Nardos, Neikas and all the others in the house send their regards. Take care of yourself that you stay well. Farewell. Year 23 of Caesar, Pachon 15. Vso: Give to Athenodoros, (my) son.

Mnaseas to my brother Athenodoros, the *dioecete*, many greetings, continued health and prosperity, because I wish it. I was deeply concerned because upon his arrival here Hermas did not have all the things which he wrote he had received from you. For he wrote me that ... he had 480 drachmas and instead of the ..., two hundred drachmas, all told 680 drachmas. Moreover, *dioecete*, look after Thermuthas and send her (money?) at once so that she not become profane at the Demeter festival. You should know that I am not at all healthy. See to it that you with all your work obligations do not neglect her. Rather make sure that even now – as always in the past – you take care of her at the right time, so that (our) joy be doubled. We are ungrateful (?). Hermas should not be negligent but rather hold you Although he roused our hopes with his letter, he has derided us. With regard to the wool: You would do well to send us quickly two (fleeces), so that they are here for the winter. If that is not possible, then send us whatever fleeces you have. Above all, take care of yourself so you stay healthy – the first thing in our prayers. Fare well. Year Vso: From Mnaseas to Athenodoros.

Achilles is outspoken in his complaints to Athenodoros about the latter's laziness and neglect, and he cites a number of precedents. However, he concludes his litany with a forceful *aposiopesis*. The real and most compelling reason for writing the letter – undoubtedly the most recent and gravest annoyance resulting from Athenodoros's lackadaisical attitude – is too fragmentary to attempt reconstructing.

19 καὶ ταῦτ': Cf. LSJ s.v. οὗτος VIII 2, on this expression.

22–23 καὶ σεα(υ)τοῦ κτλ.: It is quite obvious from this letter that this valediction is nothing more than an empty phrase, devoid of any real heartfelt concern for the recipient's well being or health. It no more committing than any of the similarly worded modern clichés such as the German “*mit freundlichen Grüßen*” or the English “sincerely yours” which are appended to any letter regardless of its contents. Achilles's whole missive consists of nothing but the most vehement reproach of Athenodoros's mishandling of various situations, and it is apparent that he could not care less about Athenodoros's health. Yet decorum and tradition prevent him from concluding his blast of invective with anything else but this time-honored turn of phrase.

Achilleus to his brother, Athenodoros, greetings and continual health, as I wish. The following five papyri, **2626–2630**, and **2652** constitute the correspondence of Eurylochos with Athenodoros.

In this letter Eurylochos reports to Athenodoros on various financial matters involving money and goods. He quotes from a letter, perhaps written by Dorion, the royal scribe in the 17th year of Augustus (lines 5–21). In the succeeding lines there is mention of deliveries and payments ranging over a period of nine years, up to Augustus's 26th year (l. 34). Various officials seem to have availed themselves of public funds over the course of these nine years. Whether this dipping into the public treasury was an act of blatant and willful self-aggrandizement – fleecing the treasury in order to line their own pockets – or an act motivated by desperation (were the officials obliged to avail themselves of public funds for their own outstanding salaries?) is not clear from the context. These details and others remain frustratingly incomplete and their interpretation hopelessly obscure.

Herakleopolites
 June 6, 4

Margins: upper 3.7, lower 1, left 2.5–3 cm. *Kollesis* almost on the right edge. The same hand as 2630.

Eurylochos complains to Athenodoros that he has been expecting a letter about some knives, but certain people, otherwise known only to these two correspondents, have been doing their best to prevent its being written and sent, although the prefect himself has ordered it be done. Having vented his spleen on this matter, Eurylochos abruptly changes the subject and divagates for the rest of the letter about a more weighty topic: corruption among the shepherds. Horos, the head of the shepherds, who has been grilled by Eurylochos, claims it is pure extortion to expect him to pay the tax on sheep from four years ago. Eurylochos tells Atheno-

doros he is willing to go ahead and exact taxes. Since Eurylochos has already rounded up some money and shearings from the delinquent shepherd, all is not lost.

Also under fire from Eurylochos is the scribe (of the shepherds' organization?) probably for misrepresenting his group's financial status. Although the scribe is obviously guilty of falsifying the records, he nonetheless staunchly protests his innocence, claiming that a statement he made on a previous occasion has been misinterpreted and used against him. However, Eurylochos has prevailed and forced the scribe to give a truthful statement.

The matter does not end here. Alongside the corruption and mismanagement of funds, physical violence has also taken place. A certain Soterichos has been attacked. Eurylochos is going to go see him – probably to question him about the affair. He will send the man to Athenodoros along with a group of shepherds who have sworn to settle the issue correctly. The rest of the missive is obscure. Eurylochos returns briefly to the matter of the long-awaited letter about the knives as well as other letters sent to Athenodoros from abroad. In the final sentence a poet and a *strategos* are mentioned.

 9 A substantive is missing after τὴν. Normally, the tax on livestock is called φόρος. Hence, one would expect the masculine definite article. Whatever the noun in question here might have been, apparently Horos is complaining about being assessed (again?) for the sheep-tax for the 22nd year of Caesar, calling it extortion.

 19 I. ἐπεὶ ἐπιβάλλεται τις.
 ὡς ἄν: Olsson 7.13 n. cites parallels.
 20 I. γενώμεθα.
 Interesting is the implication that the shepherds are being called in to pass judgement on one of their own class. S. Allam in: *Life 1–8* discusses instances of private arbitration in late Byzantine Egypt and cites relevant literature.
 24 I. δικαίαν.
 25 προχειρισθέντα: WB III, Abt. 8, lists other instances.
 29 Σελεύκου τοῦ Πτολλᾶτος: Both Seleukos and Ptollos are common names in the Athenodoros archive, but there is no guarantee that any of them can be identified with this Seleukos or this Ptollos.

Translation

Eurylochos to Athenodoros, his most beloved friend, greetings and continued health. Behaving in an unorganized manner they have until now hindered the letter about the knives. Although the prefect ordered (them) to write it, they have employed many ways; however, it was in draft. It only remains that it be written. Horos, the supervisor of the sheep, was seen by me as he was led in on the 12th by Telephonos (?), stating to me that it is extortion to demand from him the ... (tax?) on sheep for the 22nd year of Caesar ... the money-tax. But if you wish me to exact payment on him (?), I shall do it (?). If not, then I have taken (at least) something and the shearings ... while no other herder does this. Having therefore been convicted of wrongdoing by me, (the) scribe scarcely admits an oversight, claiming earlier that this was not his statement. But, since it was necessary, I have made him speak openly.

Tomorrow we have to go to Soterichos, since someone attacked him. Whenever we are there I shall send him up to you to bring shepherds who swear they will judge justly ... if I, wishing to rough (him?, them?) up, make extortion. Unless he should be convicted of knowing the proper account of things, I cannot be taken to account – unless he will be falsely judged here before the one appointed by you.

I have received the letter. I will not allow it to be given until the (letter) about the knives (arrives?) ... the letters sent you from abroad ... Seleukos, son of Ptollos, ... son, because of the poet and my (letter?) and the ones which Laomedon gave to the *strategos*. Farewell. Year 26 of Caesar, Payni 12. Margins: upper: 3.5 cm., lower: 2–3, right: negligible, left: 2 cm. A vertical *kollesis* runs a few millimeters from the right edge. At line 2 and continuing through lines 3 and 4, it makes a sharp angle to the left. Large holes in the upper fragment (P. 25264; Z. 1–8) have rendered most of the context meaningless. The lower fragment (P. 16954; Z. 9ff.), on the other hand, is comparatively well preserved, although it too has suffered occasional loss of text. The same scribe responsible for writing this letter also wrote 2629. His style of writing is a peculiarly individual one, notable both for its paleographical and orthographical forms. He rarely misses an occasion to confuse *iota* with *epsilon-iota* and *vice versa*. Verso blank.

Eurylochos writes to Athenodoros about two different matters: the first has to do with 80 drachmas about which there was evidently some initial confusion – but now everything seems to have been settled. The second matter involves grain transport.

Eurylochos to his very dear Athenodoros, greetings and continued prosperity!
 Konon received a letter on the 13th where you write that he should give the slave
 eighty drachmas (l. 5f.) The next day in the presence of Parthenion I gave Ani-
 ketos the eighty drachmas *in toto*. It is said that by the 25th the trip up ... (l. 9f.)

Write to Diogas (our) brother (= colleague), so he can peacefully (?) ... 150 artabs
 of wheat, since you have sent his 1,450 (artabs) of wheat, so that you have in Busi-
 ris ... artabs of wheat. That makes altogether ... you send to Troites together with
 the (artabs?) sealed by the merchants except for the 10,000 (artabs?). For the ones
 in Tanchais have not been able to be loaded up until now. Moreover, be careful to
 take care of yourself so that you stay in good health which I consider of utmost
 importance. Farewell. Year 21 of Caesar, Choiak 25.
 You should not impede the order for the *pittakia* to Arsinoe.

Pappos writes concerning various matters, official and private, to Athenodoros.
 Most intriguing in this letter is the mention of the arrival of a certain Gallus, pos-
 sibly the prefect of Egypt (who was heretofore unknown) at Memphis, probably
 during his annual inspection tour of Egypt, the *conventus*.

 4-5 The requisitioning of clothes in preparation for the arrival of a personage with a Latin name apparently at Memphis has all the earmarks of a prefectural visit, perhaps on the occasion of the *conventus*. Is this Gallus perhaps the prefect? Between the offices of P. Rubrius Barbarus and C. Tyrannius – that is between 12 and 7 B.C. – no prefect has yet been attested (see G. Bastianini, ZPE 17 [1975] 268). The date of this letter in March – which falls directly in the time-span allotted for the prefectural visit at Memphis – increases the likelihood that this Gallus was conducting his annual inspection tour of middle Egypt, for which the clothes mentioned in this letter had been requisitioned. For literature on the *conventus* see N. Lewis, BASP 19 (1981) 119.

Pappos to Athenodoros the most divine *dioecete*, many greetings and continual health and prosperity. Since I have been hindered from coming to Memphis for the clothes for Gallus's advent, I have sent Asklaon so that ... he comes up. If it please you, make him set out immediately so that I myself may not be impeded. I am receiving from him six (*himatia*). Asklaon has advised me that ... lawyer is arriving. Therefore I did not want to incur any expenses without your knowledge. If it please you, tell (me what to do). I have sent you the register of the land damaged by salt and the royal scribe's survey report. I am holding out (?) beyond the time limits (?). If it please you, after several days ... send pickled fish. Otherwise, take care of yourself so that you stay healthy which is my greatest concern. Farewell. Year 21 of Caesar, Phamenoth 6. This papyrus leaf appears to contain copies of, or sketches for, two letters: the first addressed to Seleukos, who is known from other letters in the Athenodoros archive; the second to Euomenos and Dionysios, who are known from 2633. Both letters describe shipments of various comestibles. The letter writer seems to have been concerned about keeping an exact record of the goods shipped – or at least the goods allegedly shipped – to his correspondents.

- 1 Σελεύκῳ: Undoubtedly the same Seleukos as in 2612 f.
2 ἰ. ἐκ.
4, 11 Cf. 2622.4, 17 n.
4-5 λευκομετώπους γεράνους: According to LSJ γέρανος can designate either a bird or a fish. For cranes in Egypt as comestibles see P.F. Houlihan, *The Birds of Ancient Egypt*, Warminster 1986, 83ff. The photo there of a demoiselle crane in an ancient Egyptian relief would appear to have inspired the description “white-faced”. However, the ornithologically more well-versed reader may prefer another identification unknown to me.

- 5 ἄβρ(αμίδες): According to LSJ s.v. this word appears in two London papyri and means "mullet". See D.J. Brewer and R. F. Friedman, *Fish and Fishing in Ancient Egypt*, Warminster 1989. Cf. P. Oxy. 2660, 2660a, for names of fishes in Greco-Roman Egypt; and G. Parássoglou, *Aegyptus* 67 (1987) 89ff.; P. Sijpesteijn, K. Worp, P. Pheretnuis, p. 69, on fisheries.
- 6 [πε]ρκίδων?, [τ]οκίδων? However, the traces on the papyrus are congruent with neither *rho* nor *omicron*.
- 8 μηκώνεια? The sole papyrological attestations for this word, if it is correctly read here, were heretofore in the medical texts. Cf. Marganne 234, 319; Steier, "Mohn", RE 15,2, 2433–2445; V. Gazza, *Aegyptus* 36 (1956) 89; C. Préaux, CdE 31 (1956) 141.1, for examples of opium in medical prescriptions. On opium: J. Scarborough, *Jnl. of the History of Biology* 11 (1978) 371–372; H. André, *Lexique des termes de botanique en latin*, Paris 1956, 228; Till, no. 106; H. Harrauer, K.A. Worp, ZPE 40 (1980) 139ff. On opium see J. Scarborough in: R. Porter, M. Teich, edd., *Drugs and Narcotics in History*, Cambridge 1994. Opium derivatives are common in Coptic prescriptions for eye ailments (Chassinat 74f.) and still used in present-day pharmaceutical products (*Pharmazeutische Stoffliste-List of Pharmaceutical Substances* [7.Aufl.], Frankfurt am Main 1988.).

On the problem of identifying ancient plants with their modern counterparts see J. Scarborough, "The Pharmacology of Sacred Plants, Herbs and Roots", in: C. Faraone and D. Obbink, edd., *Magika Hiera*, Oxford 1990, 163–164, who cautions against citing the all-too-often facile and false designations in LSJ. He strongly advises using instead the Oxford Latin Dictionary; J. André, *Les noms des plantes dans la Rome antique*, Paris 1985; A. Someone writes to Ischyrrion reporting that Ischyrrion's messenger had looked him up in Herakleopolis and given him a letter. In the letter Ischyrrion had requested him to send one of his people who should repay Ischyrrion what the anonymous let-

ter writer owes him. The anonymous letter writer does this, although he claims he owes Ischyron nothing. He closes by asking Ischyron to send the man back to him posthaste because it is the harvest season, and he needs every person he can get. Given the lack of a concluding salutation and a date – as well as the various obliterations and corrections – this letter is obviously a draft and not the final copy.

Ischyron to his best friend, greetings and continual health. While I was in Herakleopolis on the 6th I received from one of your people the letter (in which) you informed me that I should send one of my men who would acknowledge the sum of money granted to me. I have therefore sent quickly to you my friend Diogenes. I am quite aware that in the Aphroditopolite (nome) ... being absent, I owe nothing at all. Since you have been asked, my friend, write us about whatever you want, and everything will be for the good. You will do well to release Diogenes to me quickly. Sarapion to Athenodoros, many greetings and health. Since Strabon was on his way to you I considered it necessary to greet you and above all ask you to watch out for your health. I furthermore considered it necessary to inform you ... Know that I – and think about this in case something new should happen – was not negligent in informing you. About the 285 (?) balls of wool: hurry up and send them to me so that I may be pleased. Otherwise, farewell. Year 28 of Caesar .... Vso: To Athenodoros, the *epistates*.

The purport of this brief message to an unnamed *dioecete*, written with neither sender nor addressee, will have to remain obscure. Wasting no excess verbiage, the writer demands the return of an unspecified object which he had evidently placed at the disposal of someone (the *dioecete*?) the year before.

Someone informs Athenodoros that in addition to two men remiss in paying their grain-taxes he has arrested the village scribe as well. The writer requests that Athenodoros send him two police to bring the miscreants to Athenodoros for justice. A number of problems arise in connection with the interpretation of this letter's contents. However, there is little likelihood that they will ever be clarified. The writer mentions "old accounts" (l. 5). One would like to know more exactly how old they are. In other words, what was the period of grace enjoyed by tax delinquents at this time and place? Why was the village scribe arrested? Was he suspected of collusion with the two criminals, or was his detention a routine affair until the matter could be cleared up? Since one of his responsibilities was keeping proper tax accounts on the amount of taxes collected and still outstanding, it would have been a rather easy matter to determine if he had done his job conscientiously or if he had falsified the records.

(N.N. to Athenodoros, greetings and above all good health). I have rounded up Philippos, son of Ekkrates, registered in the tax-office in the old record book as being remiss in his taxes to the amount of 7 artabs of wheat and Dionys, son of Protarchos, for 21 artabs of wheat – and the village scribe for the year as well – and I am holding them in prison. Athenodoros to his brother, Theophilos, greetings and good health! The tax collector from Peensamoi has called one of our farmers, Petesuchos, to account for the ... grain ... and has treated him very insolently. You will, therefore, do well to investigate ... and send him a winnowing shovel (?). Farewell. Year 20 of Caesar, Mesore 16. Vso: To my brother, Theophilos.

Athenodoros to N.N., many greetings, continual health and prosperity, because I wish it. Excuse me for not writing you more often. The season for the sowing and the watering has kept me "up in the air". However, it seems, if you did not write me how things are with you ..., (l. 16), to write you at present. Otherwise, take care of yourself, so you stay healthy ....

#### 2646 Letter

P. 25273  
 24.7 x 30 cm.

Herakleopolites  
 May 12, 3

Margins: upper 2.7, below col. II: 3 cm. One *kollesis* 14 cm. from the left edge and another flush with the right edge. Written in the same hand as 2614, 2634, 2636, 2641, 2642, 2653, 2666 and 2667 but in much larger letters.

Unusual is the arrangement of the writing on the page. The left column contains the letter proper with its salutation in the first line and conclusion, valediction and dating in their usual places in the last lines. However, the second column of writing, which is unadorned by any salutation, valediction or other indication as to the reason for its presence on the same page, obviously belongs to the same letter. For,

in addition to the identical paleography of both columns of writing, further proof that they are part and parcel of the same letter are the occasional line ends from the left column which run over the *kollesis* onto the next sheet. Since the second column lacks any identifying ear marks, it is probably best to treat it as a gigantic *post scriptum*.

Someone, either Diokes or a *dioecete*, writes to Athenodoros about various matters concerning other officials – including past and present prefects, police and soldiers – and finances.

N.N. to (Athenodoros, the) sweetest ... (l. 12ff.) with much annoyance. Concerning  
 the installment – namely 20 drachmas – which you gave me for purchases in the  
 Peri Busirin (toparchy): unless you do not give two hundred drachmas, he is not in

agreement (or: it is impossible, *i.e.* to purchase). If it please you, write to the pre-  
 fect about the policemen. If not, then I will take three soldiers from him. If it  
 please you, write me immediately what I should do. The ship is not sailing at all  
 (?). You would do me a favor to take care of yourself so you stay healthy. Farewell.  
 Year 27 of Caesar, Pachon 17.

I have written you before why it is not permitted to give Afinius either the letter or  
 the installment: it is so that he may not be reminded. Know that ... it was made  
 known in a letter that it was returned to Afinius by Alexas, Tychon' brother. He is  
 very disturbed. Heras will forget the 10 talents, because Tyrannius (the prefect) has  
 calmed down a bit, so that we can get a letter from him. Encourage Askas, Areos's  
 agent. The gods willing, his matter will be put in order outside – as he promised. We  
 will try to ... Damas. That is why Tycho is coming to the city. If the boat should  
 arrive, your agents will embark. I want to have the prefect's letter – if it please you!  
 Give (this) to Athenodoros. Diokes to Athenodoros.

Although the left half of this letter has broken off, taking with it the names of both correspondents, it probably belongs to Athenodoros's archive, since a certain Tryphas, known from other letters (2617.1,12, 2618.1) also appears in this one. Furthermore, it is written in the same script as 2659 and 2662. The main purpose of this letter was to greet the "folks back home" and to ask for some bread to be sent.

Athenodoros writes to Eurylochos about a sum of 2000 silver drachmas on the tax-account of the *arithmetikon katoikon*. Although this tax is well attested for Roman Egypt, most of the instances refer to the Arsinoite nome. Here is a rare instance of this tax with explicit reference to the Herakleopolite nome (l. 3). It is, furthermore, one of the earliest attestations to this tax. O. Tait Ashmol. 24 (9 B.C.) is the earliest dated receipt for this tax. Unfortunately, no date is preserved on this letter. However, since Athenodoros's and Eurylochos's other letters date from 10/9 to 2 B.C., one can therefore posit the composition of this letter as roughly contemporary.

Philotas commends to Soterichos, the *dioecete*, a farmer named Ptoys who is bring-  
ing this letter to Soterichos. Philotas requests Soterichos's help in collecting the  
rental fees which certain unnamed people owe Ptoys for the right to graze their  
herds on his pasture land.

R. Hübner, P. Köln III 146 introd., was the first to recognize that payments for  
grazed pasture land such as one finds here, in P. Köln III 146, in P. Ryl. II 73 and in  
PSI IX 1057, are not restitution for damaged property but rather fees for contrac-  
tually guaranteed grazing rights.

This letter belongs to the well known and often discussed genre of recommenda-

Herakleides to his brother, Soteles, many greetings and health, as I pray (for it). Even in Herakleopolis I reminded you of (our?) jar of oil which ... Athenodoros, our brother, ... to me. Please be so kind, therefore, to get (the oil) from me measured out in just measure, after you have received the order from the same police officer. Do not act contrary (to my wishes)! Write me about whatsoever you wish ... on account of Petearmotes. And (take care of) yourself (so that you stay) healthy. Farewell. (Year ... of Caesar), Phamenoth 13. Vso: To Soteles.

## Translation

Heraklas to his most divine father, many greetings and continued health. I wrote you another (letter) about the dam so that you might do everything you possibly can to accomplish erecting the wall of earth, in order that the ... not be destroyed. You would do well, either when you receive this letter .... You would do well .... If you need money, get some changed out of the household cash. If Horos does not find any men, tell Hermas, and he will come to your aid. Remember: if the dike is not made, then the land is in danger of being left unwatered, with the result that even last year's dike is destroyed. Therefore, since you have been asked, do not make any silly arguments! Above all, take care of yourself so you stay healthy. Farewell. (Year) 30 of Caesar, Mesore 21. Vso: To father.

The layout of the present text is not at all clear. Preceding the body of the main communication (lines 10-34) is a short note (lines 1-9) which looks - and sounds - like an afterthought, penned onto the papyrus soon after the main text was written. Yet it seems unusual that such a large upper margin (8 cm.) would have been left gaping above the main text - almost as if on purpose.

Sosibios writes about the shipment of various commodities.

Concerning the honey: I have not received it, yet I have paid them – Soterichos and Ischyrras. While I was wanting to come to pay you a visit (or: “to have you examine this”), I received notice from the agents of Phileros ... that I have it. Stay healthy. (From) Sosibios. The ship should have been here on the 25th. We exerted ourselves until the things recorded here below were unloaded: 15 *keramia* of wine, 2 of vinegar, 2 of lees, 8 *metretai* of oil, 1 sealed (*metretes*) of foreign (oil), and 10 *choinices* of beans and bruised corn, of which 4 *choinices* are in the harbor ... 3 Arsinoite ..., 3 piglets, and 65 .... I have not received the castrated pig. Under cover on the ship’s deck are 4 willow logs. You write to me to take 5, so I can have them, as well as 4 (logs) of olive wood which have been sold. There are another ten (logs) of olive wood, instead of the eleven that you wrote me. I have taken the 12 *keramia* of vinegar. Lying in the harbor are 2 bifurcated logs; like-wise in the harbor ... of a log. The receipt for the honey is sealed. I have been very careful! Take care of yourself so you stay well, which is my greatest desire. Year 18 of Caesar, Epeiph .... Vso: From Sosibios.

Margins: upper 3, lower 3.5, negligible right margin; *kollesis* almost flush with the right edge of the papyrus. The script is the same as that on 2649 and 2659. Athenodoros, in his capacity as overseer of Asklepiades’s affairs, writes to the *strategos* (of the Herakleopolite nome), complaining that Athenion (who also appears in 2605) is impeding the collection of grain-taxes from the farmers. He appeals to the *strategos* to intervene and appends a list of the outstanding amounts of grain arranged according to toparchies and kleroi.

Dec. 19, 9

The papyrus has been cut off and is missing an indeterminate amount from the top. Margins: right: negligible, left 1.2, lower 2.5 cm. *Kollesis* 3.7 cm. from the left. The same hand as that on 2643. Verso blank.

Although the names of both the epistolographer and addressee are lost, the appearance of Soterichos who is known from the Athenodoros correspondence makes the attribution to this archive almost certain. While the main gist of the letter concerns humdrum details of daily life, one detail sticks out above all the others and particularly piques our curiosity. In lines 9-10 the writer chides his correspondent for not writing him anything about Isis Lochias – and leaves the matter at that.

Although Isis Lochias is not otherwise attested in Egypt, the epithet is not surprising since Isis was revered as protectrice of pregnant women in Egypt since pharaonic times. It would be interesting to know the background story for this admonishment. Was a festival imminent for which preparations had to be made? Or was it a birth that was being anticipated, with propitiations, sacrifices and rituals which had to be/had been performed? Was a separate, entire temple or shrine involved? If so, where was it located? Or was Isis Lochias worshipped as σύνναος θεός with various other deities in one larger temple? – questions to which we will probably never learn the answer.

Tryphaina writes to her son, Asklepiades, reporting on the condition of various fields some of which were either only partially flooded or else not at all. Since their flooding and covering with the rich Nile silt was prerequisite for a good harvest, Tryphaina fears imminent financial ruin. She momentarily digresses from these matters to discuss some articles of clothing, but soon she returns to the more pressing agricultural matters.

This letter does not belong to the Athenodoros archive but to a smaller, private archive of letters published as **1203–1209** = Olsson, nos. 1–7.

- 1 Τρύφαινα: This is Tryphaina's first appearance in this correspondence. Until now we knew the names of her four children: Asklepiades, Petechon, Isidora and Paniskos.  
 3 *l.* λαβοῦσα. τὸ ... γράμμα: Cf. the same wording in **1209.3**. The plural τὰ ... γράμματα is more common: **1204.3**, **1205.6**. The singular also in **2645.7**  
 4 Ὀγου: This village is also attested in **2436.3**, SPP X 204.4; cf. Calderini-Daris, *Dizionario s.v.* κλῆρος ὁ Ἀγελάου: A parcel named after Agelaos is also attested in **1828.9**.  
 5 *l.* βρεχῆσεται: Cf. Gignac, *Morphology* 314.2, on this form; R. Tölle-Kastenbein, *Antike Wasserkultur*, Munich 1990, on this topic.  
 8 *l.* πάντως?  
 9–10 θανάσιμος: Cf. O. Montevicchi in: *Miscellanea Papyrologica* (= P. Flor. XIX), vol. II, Florence 1990, 443–449, on adjectives in -σιμος.  
 10–11 In **1204.10–11**, written on October 2, 28 B.C., Isidora, the sister of Asklepiades, writes to her brother, requesting him to send her a blanket. Three weeks later (in **1205**) she

writes that she has sent him 120 drachmas for the blanket, although it is not worth more than 5 drachmas. Even if the correspondent here is Tryphaina, the business could still be about the same blanket.

- 11 *l.* ἐγκοιμήτρων: Coming just after the mention of a deathly sick person (ὁ θανάσιμος), this word could be construed as a misspelling of ἐγκοιμητήριον or κοιμητήριον. Hence, one might want to interpret the sentence: “and the price for the burial has not yet been established”. Since, however, much of the correspondence in this archive relates to matters regarding blankets and other textiles (**1204.10**, **1205.19–24**, **1207.5–7**), the word here is probably best left unemended.  
*l.* σανδύκινων: See Olsson, no. 5.6 n; R. Eisler, *Weltenmantel u. Himmelszelt*, Munich 1910, 167.2, on the etymology and related word formations.  
*l.* λεπ[τῶν] κεκροσμένων: Forbes IV *passim* describes textile manufacture in which the raw materials are often beaten.  
 12 ὑγιδί[ων]?, ὑδκ.ι[?]  
 μειρακ[ίου]: In **1204.11** and **1205.25** a child, Artemas, is mentioned.  
 13 Another possibility is to emend to καὶ τῆς τιμῆς μὴ ἀμελήσης.  
 16 Νῶιν: A village, otherwise attested only in **2370.5**, **2420.6?**. Cf. **2425.7,27**: Νωίτης.  
 17 Ταλή: See P. Hibeh 36.3 n. on the orthography of this village name.  
 19–22 These four concluding lines were inserted into the upper margin with a slight indentation to the right.

#### Translation

Tryphaina to her son, Asklepiades, (greetings) and continual health ... I received your letter on the 16th. If Agelaos's kleros near Ogu has been only half flooded and the kleros near Muchis so far not flooded at all, then I am totally ruined – along with the money on loan for the dams. The things which you wrote about are worth more here. The deathly sick .... and the price of two fine, red, beaten blankets and the child's ... has not yet been established. Don't forget the price .... I sent your shoe back with Apollos. The thirty aruras near Nois have been flooded. You should not rent out the tract near Tale but rather use it yourself .... Farewell. Year 3 of Caesar ....

Margins: left 2.7, upper 3.3. The papyrus is broken off on the right and bottom. This unassuming scrap of papyrus is important for two reasons: it lists Athenodoros's possessions or provisions in Alexandria, among which is a store of Kalymnian wheat – a commodity otherwise unattested in the Greek papyri from Roman Egypt.

Kalymnian wheat is not otherwise attested in the Greek papyri from Egypt. Whereas the island's honey enjoyed wide repute, its wheat seems otherwise to have drawn no attention. Cf. Büchner, "Kalydna", RE X,2, 1762, *id.*, "Kalymna", RE X,2, 1768. μ'ε/(τρφ) "Ερ'μου/?: Cf. 1142.7, where the Hermes-measure for wheat appears in an Alexandrian contract. Whether it is the correct resolution of these abbreviations is, of course, a moot question.  
 α( ): *non liquet*. Alpha with a *Hakenalpha* above is not easily explicated. Presumably it is the abbreviation of a container, and its gender is feminine – since in the next line there is a similar entry preceded by ἄλλας – other (such jars or vessels?)  
 5 χ'η/( ): *non liquet*.

## 2669 Inventory List

P. 25382

Herakleopolites

One fragment measures 27 x 12.5 cm. and preserves a vertical *kollesis* running down the middle. Margins: left 6 cm., upper 3.5 cm. Broken off on the right and bottom. Another fragment measures 26.5 x 27.5 cm. with a vertical *kollesis* 9.5 cm. from the right edge and ca. 15 cm. further to the left of the *kollesis* a light patch on the left edge of the papyrus indicating where another *kollesis* may once have been. Margins: upper 3–4 cm., right 1.3 cm., lower 2 cm. (col. I), 3 cm. (col. II), 19.5 cm.

(col. III). The relationship of the two fragments to each other is difficult to ascertain. The larger fragment seems to preserve both the beginning (with the heading in lines 1–4) and the end (Col. III which ends high up on the sheet). The smaller fragment whose contours give the deceptive impression of joining onto the left of the larger fragment, apparently does not belong here at all but somewhere else. No ready solution offers itself. Verso blank.

The present inventory list preserves an account of clothes, vessels and other objects of use in daily life and offers little to distinguish itself from the many others like it preserved on the papyri from Greco-Roman Egypt. Similar lists are PUG II 56; SPP XX 67 = M. David, Papyrological Primer, Leiden 1965, no. 87. See in general: T. Reekmans, “Treasure-Trove and Parapherna”, in: *Le monde grec. Homages à Cl. ### 2670 Official Account

P. 25383  
41 x 15 cm.

Herakleopolites  
ca. 14/13

Upper margin: 3.5 cm.; broken off on the other three sides. Two vertical *kolleseis* 17 cm. apart from each other. Traces of four columns of writing in the same script as 2595. Verso blank.

The present account is apparently official, since it lists monetary income from individuals and groups of workers or artisans in various localities in the Herakleopolite nome. One item of special interest: an official named Lupus was evidently making an inspection tour of the province (II 1: εἰς παρουσίαν Λ(ο)ύπου). The amounts of money recorded in the ensuing lines indicate the income received which was supposedly used to defray the cost of provisioning him. Alongside individual persons paying money, also such commercial groups as sheep-herding Arabs (II 2), leather workers (II 4), coppersmiths (II 6), linen weavers (III 6), and beer brewers (I 2) are named. Even a *sitologos* (III 5) is recorded as a contributor. The list is arranged according to toparchies (II 1, III 9) with presumably the name of the toparchy preceding the village name, Thmoiamunis, in III 1.

ζυτοπ[οι-]: See H. Harrauer, CPR XIII, pp. 82ff.

## Col. II

- 1 περὶ Τεκμί: A toparchy in the Herakleopolite nome already attested in Ptolemaic times; cf. 2437.1; P. Hels. I 24.6; BGU XIV, pp. 220f.; Falivene 205.  
 αὶ σημαινόμ/(εναι) *scil.* δραγμαί.

παρουσίαν: A common *terminus technicus* used for designating the prefect's *conventus* – as well as the visit of any distinguished personage; see 2211 introd.; Horsley, NDIEC I, p. 46; N. Lewis, BASP 18 (1981) 119–129; T. Carp, P. Oxy. 3357.8 n. A. Niederstätter, Ante Portas. Herrscherbesuche am Bodensee 839–1507, Konstanz 1993, while discussing more modern parallels, nonetheless presents a vivid picture of what such visits must have entailed in antiquity.

Λ(ο)ύπον: In 2602.6 a certain Lupus, *strategos* (of the Herakleopolite nome?), is mentioned (cf. 2595.7 n.). Presumably this is the same personage for whose tour of the nome this income is being calculated.

- 2 Φαινίππου: Obviously a village name, since it is subsumed under the heading of the Peri Tekmi toparchy and succeeded by an occupational group. The name has the archaic ring of a Ptolemaic large-landowner's name which in the course of time became permanently associated with the territory involved. See F. Zucker, "Beobachtungen zu den permanenten Klerosnamen", in: Studien zur Papyrologie und antiken Wirtschaftsgeschichte Fr. Oertel ... gewidmet, Bonn 1964, 101–106.

Ἀράβων: Calderini, Dizionario I,2, pp. 188–190, and M. Abd-el-Ghany in: Egitto e storia antica 233–242, discuss Arabs in the Greek papyri. Often they were shepherds – as is the

case here, where they have paid 200 drachmas for the right to graze their sheep (cf. 2654 introd.). Cf. F. Altheim, R. Stadelmann, "Araber in Ägypten", LdÄ I 359–360.

- 2,3 L = (ἔτους).

- 4 κόσμου/ ὄνου: See G. Nachtergaele, CdE 64 (1989) 287–336, discussing beasts of burden and their equipment. The accompanying illustrations vividly depict their often decorative trappings.

## Col. III

- 1 Θμοιαμούνεως: (Presumably the toparchy preceded the village name, but the papyrus is too shredded and abraded to entertain any hopes of retrieving the name.) This village is attested from the second to the eighth centuries, according to Calderini-Daris, Dizionario.

- 8 L = (ἔτους).

- 5, 7 [...]ουθδ/ ( ) : *non liquet*.

- 6-7 " To N. N., son of Alexandros, for a slave, Apellas" is just one of several possibilities for interpreting this entry.

παιδ/ (ρί-): See J. Rea, P. Oxy. 3960.28 n., summarizing the *status questionis* on the interpretation of this and similar words.

- 8 λεμησᾶ κορκοδ/(ίλου): "Priest of the crocodile" (god, *i.e.* Souchos). This sacerdotal title, *lemusos*, also appears in SB I 1007.7, P. Tebt. I 122.1 and P. Soknabr. 2.53 (= YCS 10 [1947] 215ff.). F. de Cenival, *Les associations religieuses en Egypte*, Cairo 1972, 161-162, after discussing the Egyptian etymology summarizes: "*le titre mr ms' désigne bien, à l'époque lagide et romaine, un personnage appartenant à la hiérarchie militaire, et cumulant des fonctions de prêtres et d'administrateur d'un temple avec des fonctions militaires ou policières*". On the side with vertical fibers is a list of priests arranged according to their *phylai*, identical with 1196.65-83, 101-123. Given the lack of any heading or concluding notes, it is impossible to say whether this list is a copy of 1196 or another, separate listing for a different year. 1196 preserves 17 names which are missing here between the last entry in col. In other words, from the edge of the one *kollesis* to the edge of the other *kollesis* were ca. 18 cm.

This side of the papyrus bears an account listing men's names and amounts in artabs – as well as a poem (published in Congr. 18, vol. II 107–111.) Since the six lines of poetry occupy the space directly adjacent to the first column and the continuation of the account lies below the poem, presumably the poem was written on the papyrus before the account. Someone who later used the same sheet of papyrus was obliged to arrange his account around the already existing verses.

↓ Margins: upper 3.5–4 cm., lower (col. II) 3 cm., (col. III) 2 cm. On this side of the papyrus are lists of men's names with the occasional indication of their occupation. At the end of Col. II is a tally, presumably indicating the number of men in the preceding entries according to certain criteria unbeknown to us today.

The writing on both sides of the papyrus is in the cursive documentary style typical of the late first century B.C. It is difficult to tell whether the same hand was responsible for writing both lists.

## 2674 Accounts

P. 16948 A, B, 25185, 25186

Herakleopolites

I c. B.C.

The identical script and the presumably identical content make it plausible that the following fragments all derive from the same account. The same script can be seen on 2672 and maybe 2673. Somewhat similar is the script of 2577. Thus it is possible that these fragments might either belong to that register or may have been written by the same scribe.

The fragments published here tally men (rarely women) and amounts of money (?). Where a particular man's father is not known, his occupation is given.
